# SYSTEM

The ESTonetex System, is the only one in the market that includes the necessary products from the beginning to the end of the work.

This system has been tested for the last 30 years in more than 40 countries (Spain, Mexico, Sweden, Australia, Saudi Arabia, etc)

# VERTICAL WALLS

## *Stone, Brick and Wood*

- In this case, most of the surfaces are made with concrete brick, brick, concrete, plasterboard, or styrofoam
- Some indoor walls have been painted or plastered with gypsum, in this cases we have to prepare the surface

- For theming, we can use:
  - ESTonetex TXT
  - ESTonetex Park

## *Vertical Rock*

# CONCRETE BRICK WALLS

Clean the surface from  
dust and dirt.

STEP 1

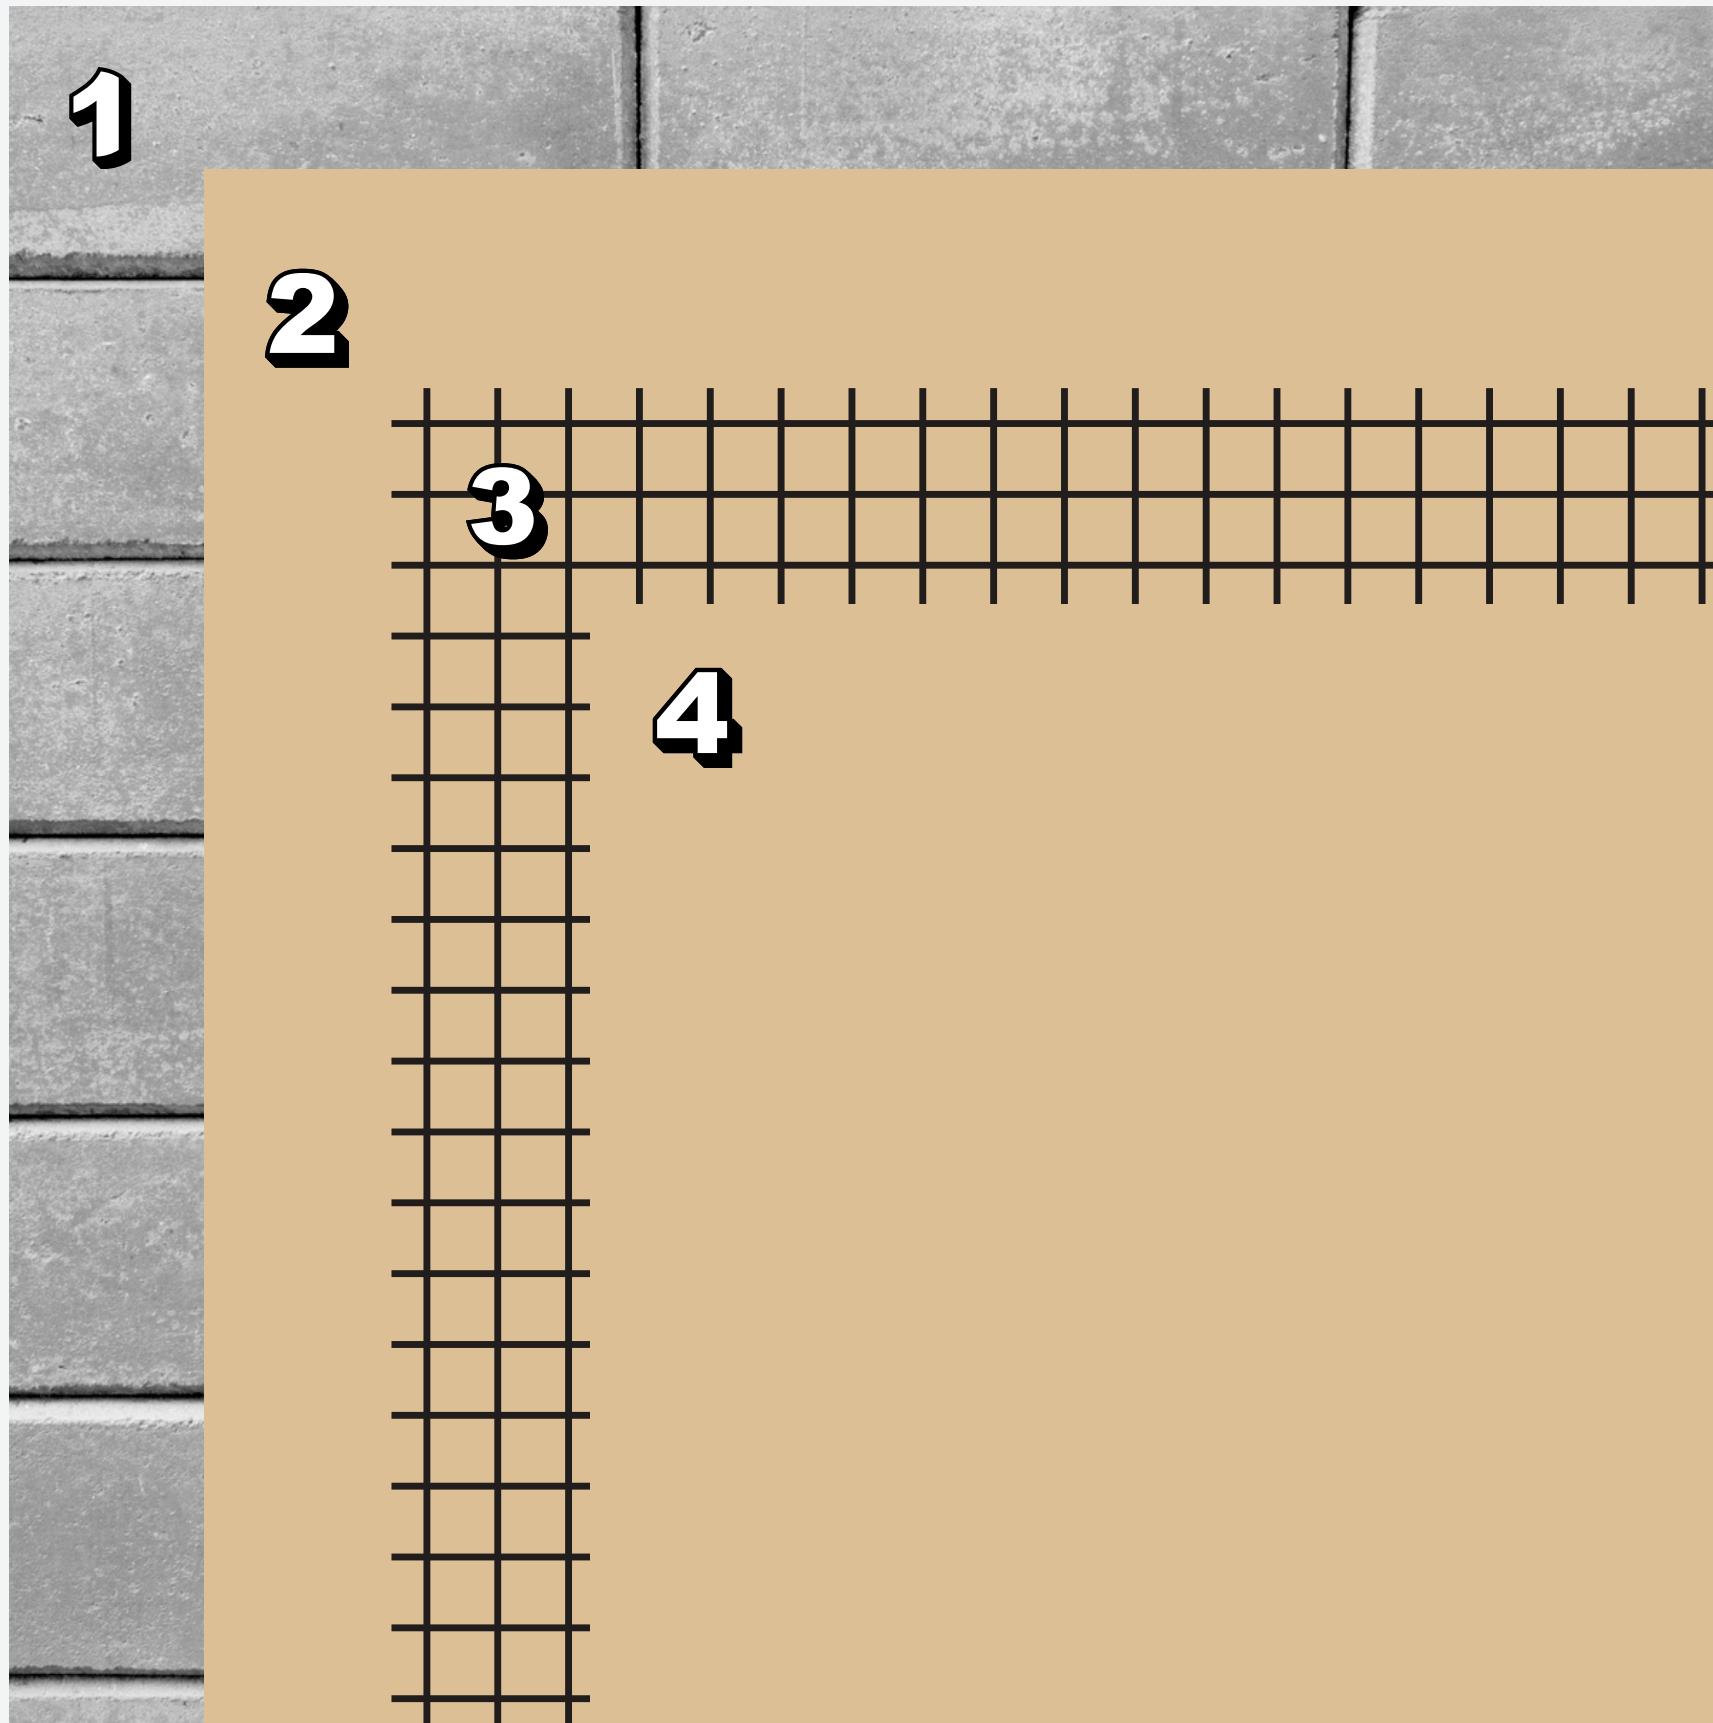

Apply a thin layer of 4-5  
mm of mortar  
ESTonetex TXT or  
ESTonetex Park.  
And put a fiberglass  
mesh on top.

STEP 2

Once the mesh is  
placed, apply mortar  
ESTonetex-TXT or  
ESTonetex Park, with  
the necessary thickness.

STEP 3

1. Concrete brick wall
2. ESTonetex TXT / Park (4-5 mm)
3. Fiberglass mesh (82 gr)
4. ESTonetex TXT / Park (1-20 cm)

Consumption: 1,5 - 2 bags x sqm

# BRICK WALLS

Clean the surface from  
dust and dirt.

STEP 1

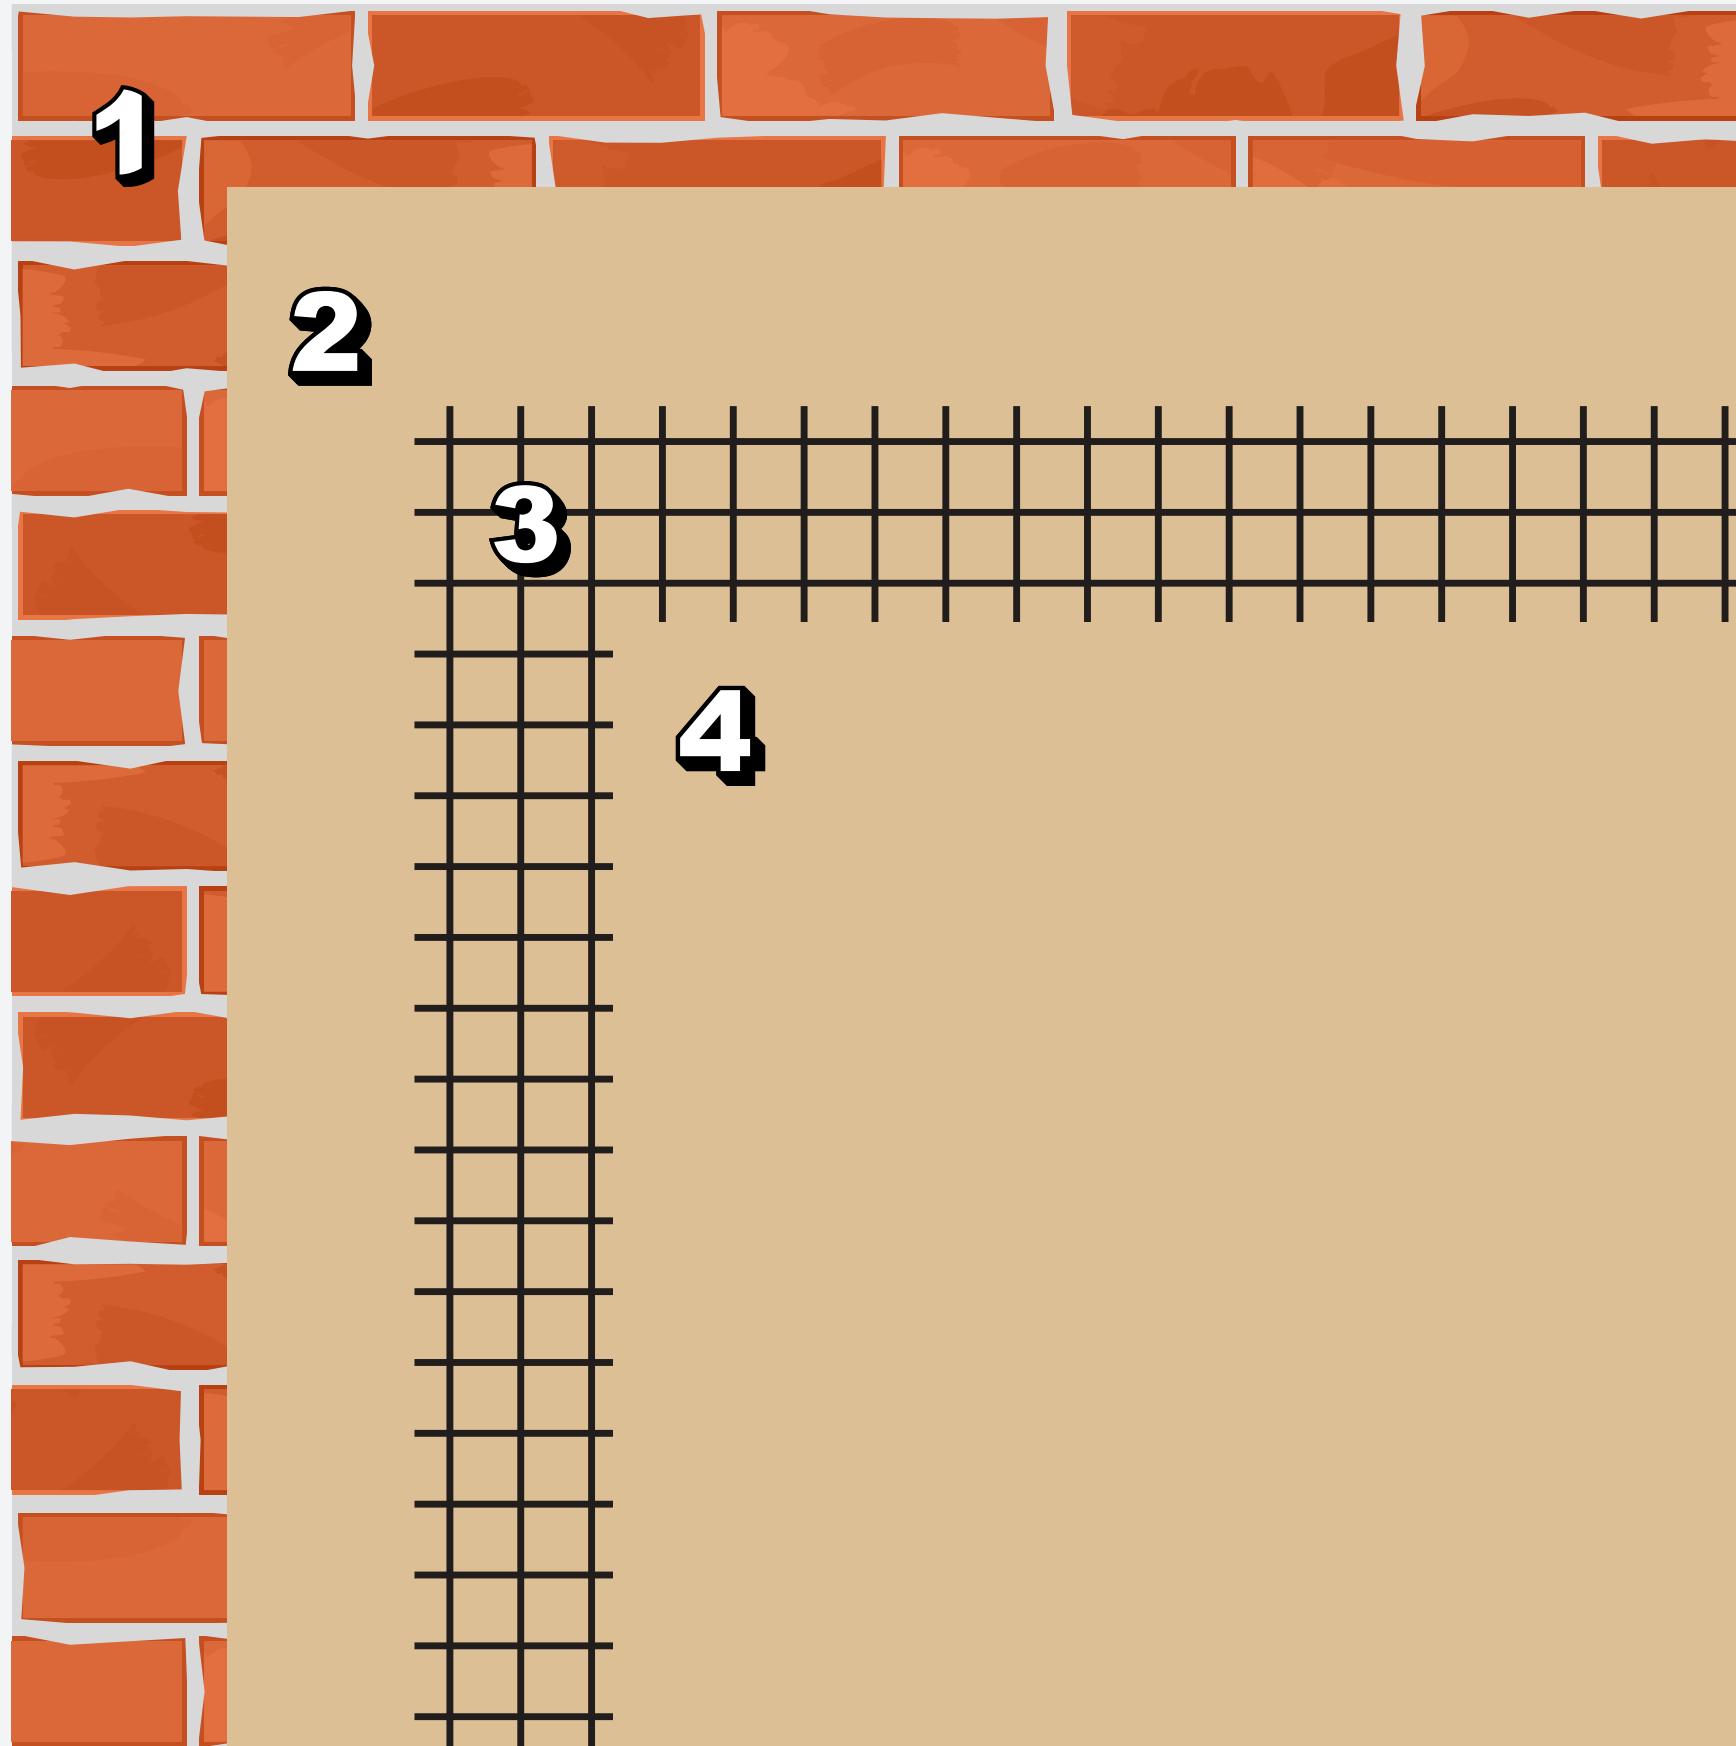

Apply a thin layer of 4-5  
mm of mortar  
ESTonetex TXT or  
ESTonetex Park.  
And put a fiberglass  
mesh on top.

STEP 2

Once the mesh is  
placed, apply mortar  
ESTonetex-TXT or  
ESTonetex Park, with  
the necessary thickness.

STEP 3

1. Brick wall
2. ESTonetex TXT / Park (4-5 mm)
3. Fiberglass mesh (82 gr)
4. ESTonetex TXT / Park (1-20 cm)

Consumption: 1,5 - 2 bags x sqm

# CONCRETE

Clean the surface from  
dust and dirt.

STEP 1

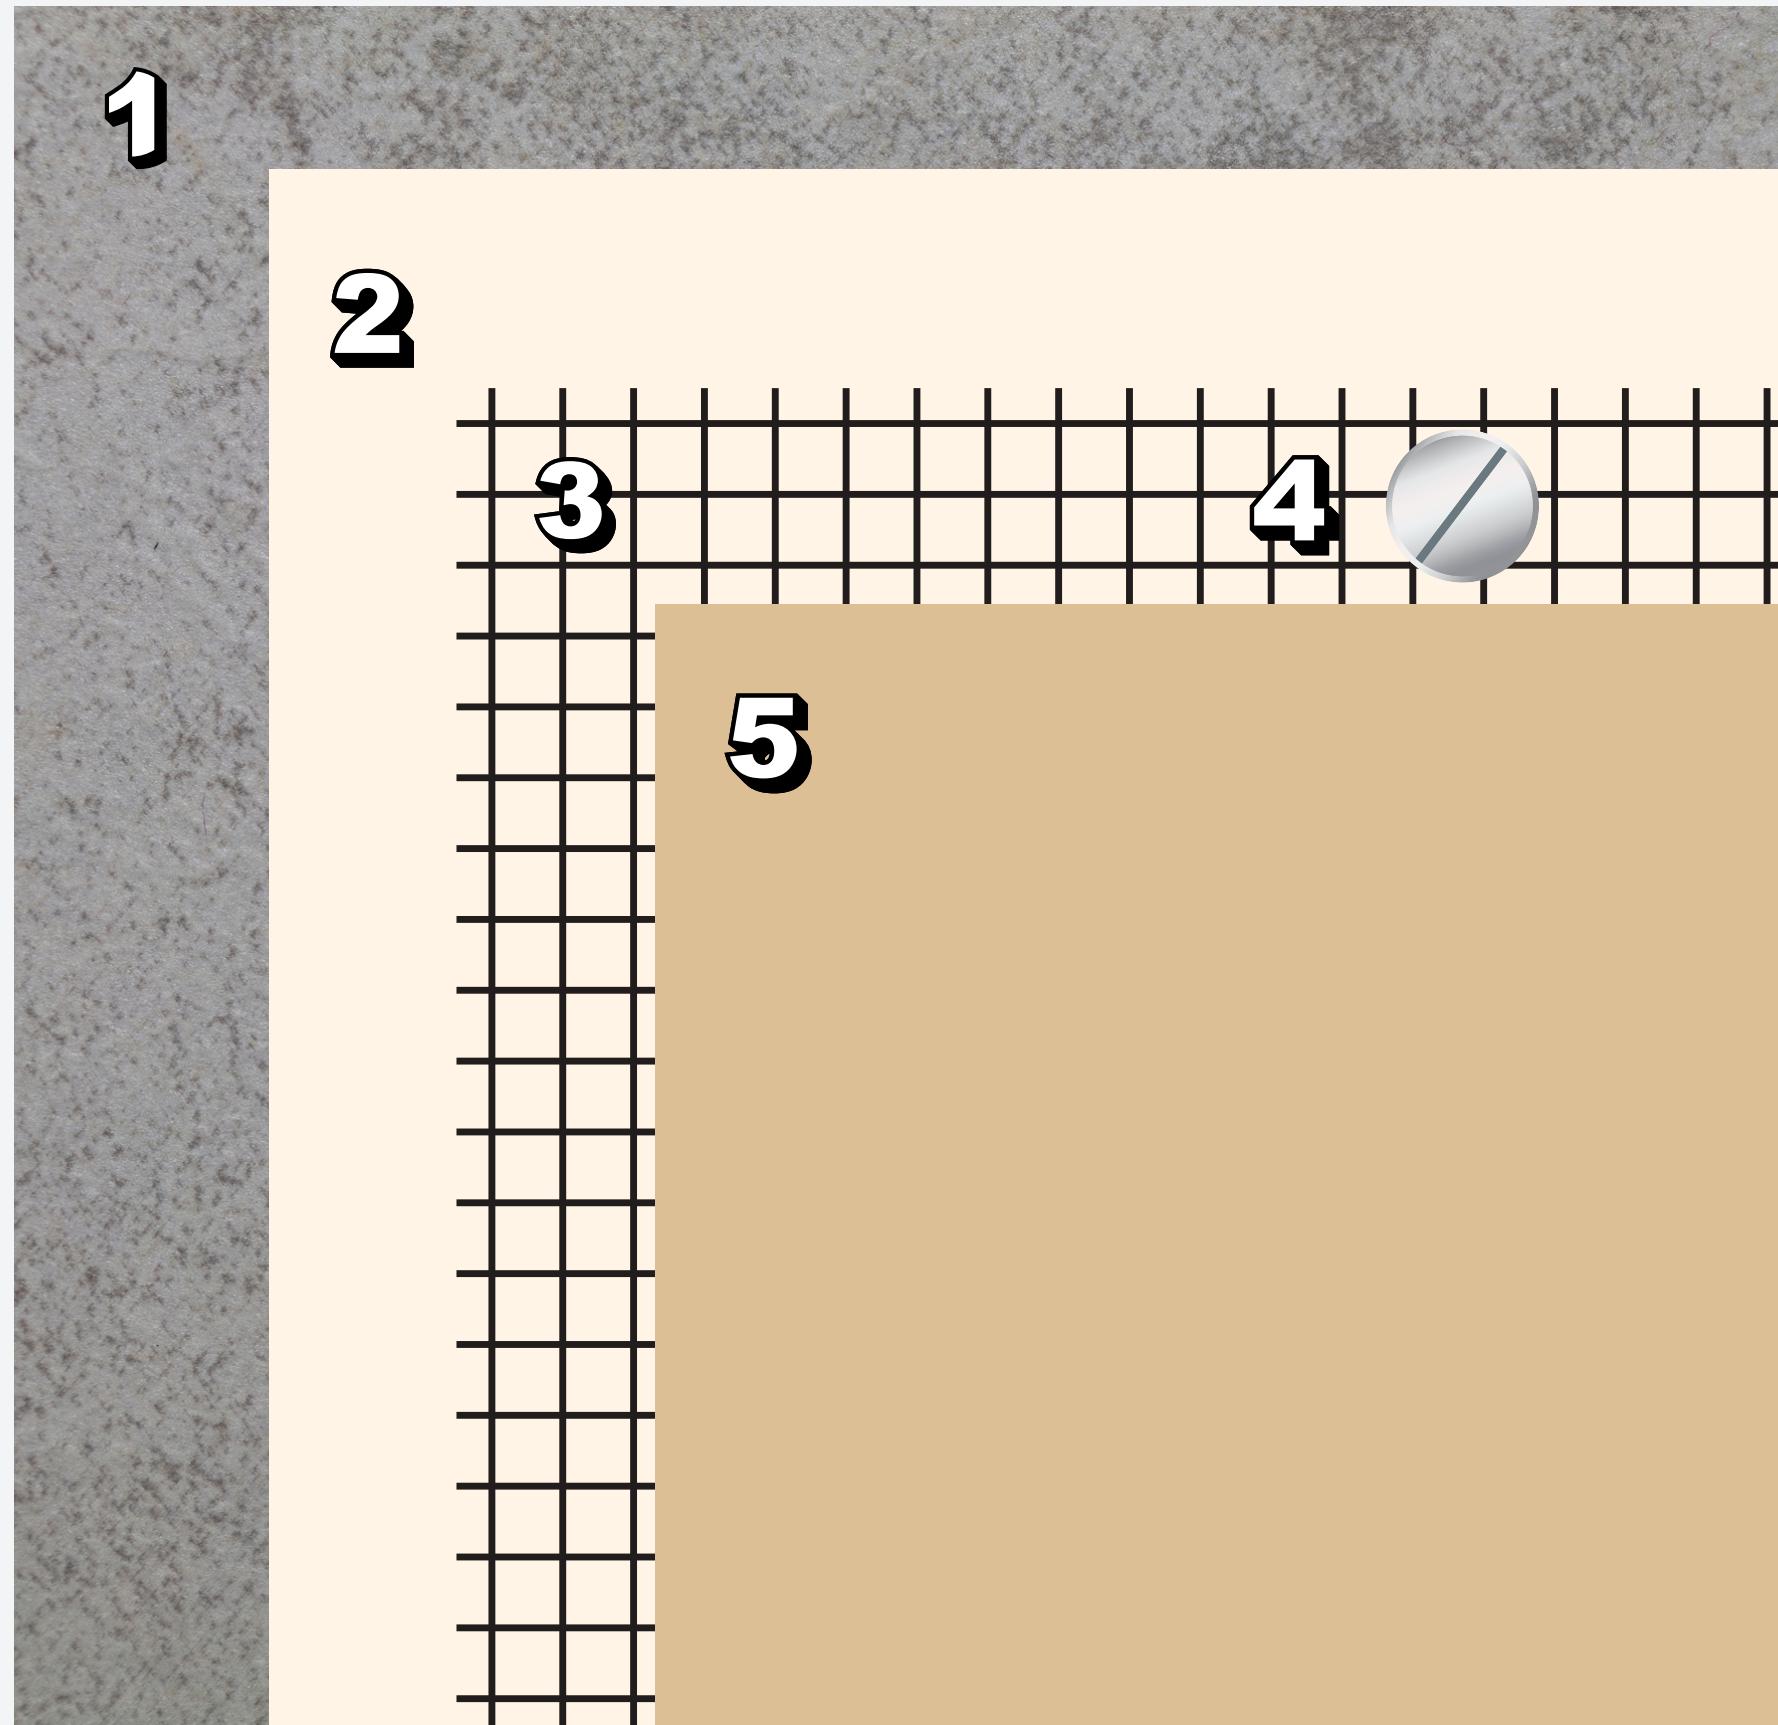

Apply a thin layer of 4-5  
mm of mortar  
ESTonetex Forte.  
And put a fiberglass  
mesh on top, then put  
fixing anchors.  
After a few minutes,  
scratch the surface and  
wait 24 hours.

STEP 2

Once the surface is dry,  
apply mortar  
ESTonetex-TXT or  
ESTonetex Park, with  
the necessary thickness.

STEP 3

1. Concrete wall
2. ESTonetex Forte (4-5 mm)
3. Fiberglass mesh (82 gr)
4. Fixing anchors (70 mm)
5. ESTonetex TXT / Park (1-20 cm)

Consumption Forte: 8,3 kg x sqm

Consumption TXT: 1,5 - 2 bags x sqm

# PLASTERBOARD

Apply a thin layer of 4-5 mm of mortar ESTonetex Forte.

**STEP 1**

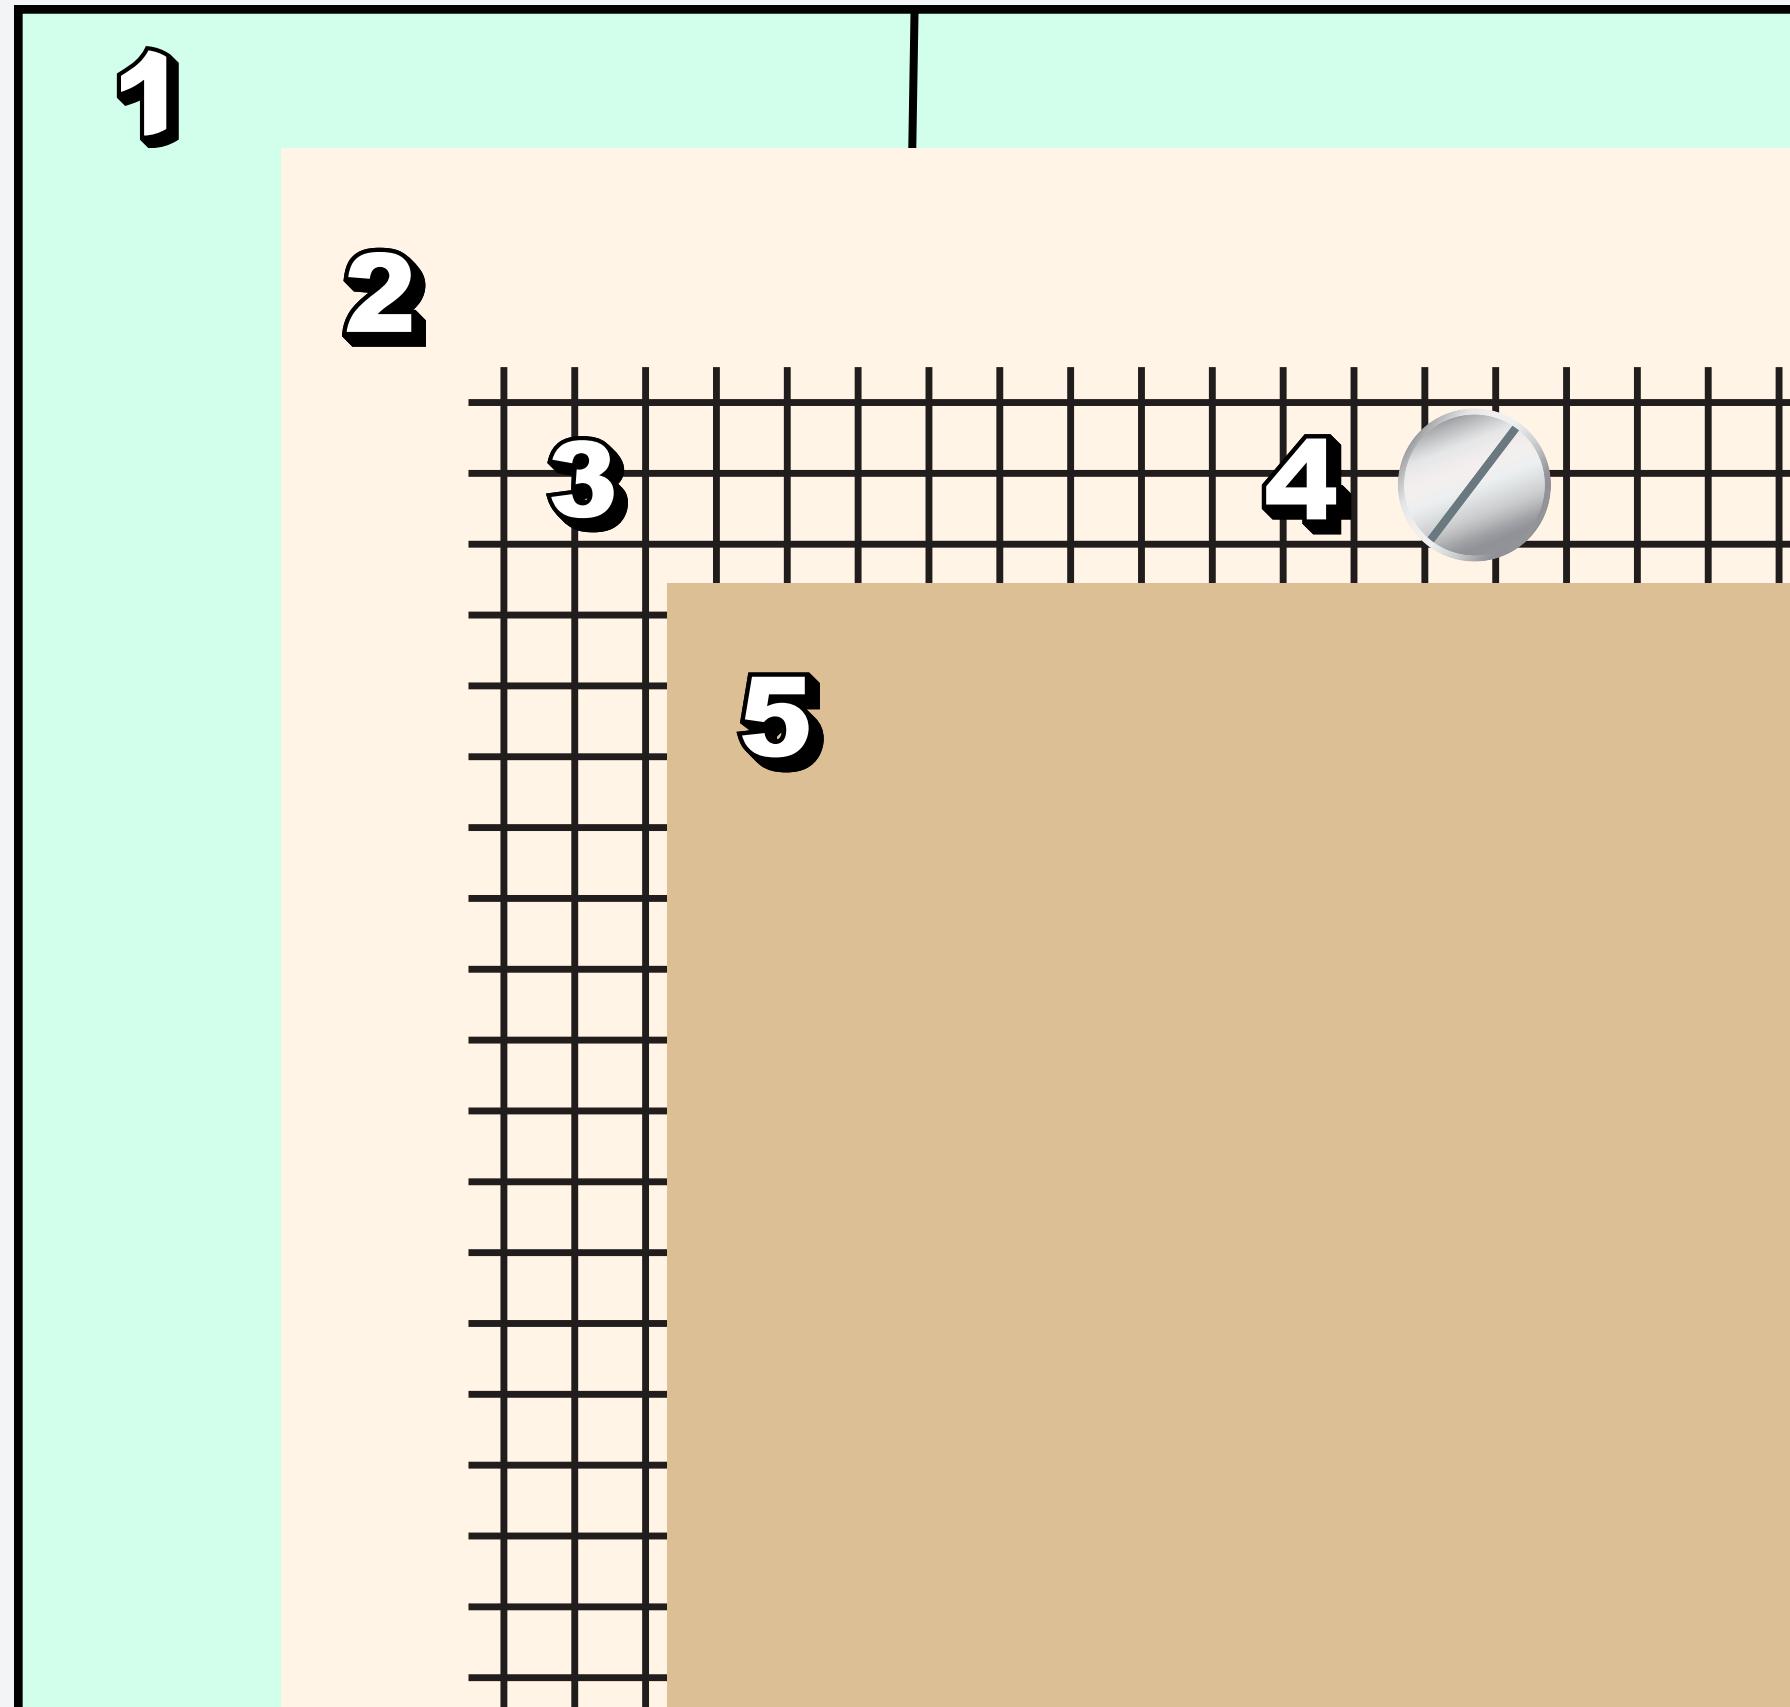

Put fiberglass mesh on top, then put screws. After a few minutes, scratch the surface and wait 24 hours.

**STEP 2**

Once the surface is dry, apply mortar ESTonetex-TXT or ESTonetex Park, with the necessary thickness.

**STEP 3**

1. Plasterboard wall
2. ESTonetex Forte (4-5 mm)
3. Fiberglass mesh (82 gr)
4. Screws (with wide washer)
5. ESTonetex TXT / Park (1-20 cm)

Consumption Forte: 8,3 kg x sqm

Consumption TXT: 1,5 - 2 bags x sqm

# STYROFOAM (EPS-XPS)

Scratch the styrofoam  
and clean the surface.

STEP 1

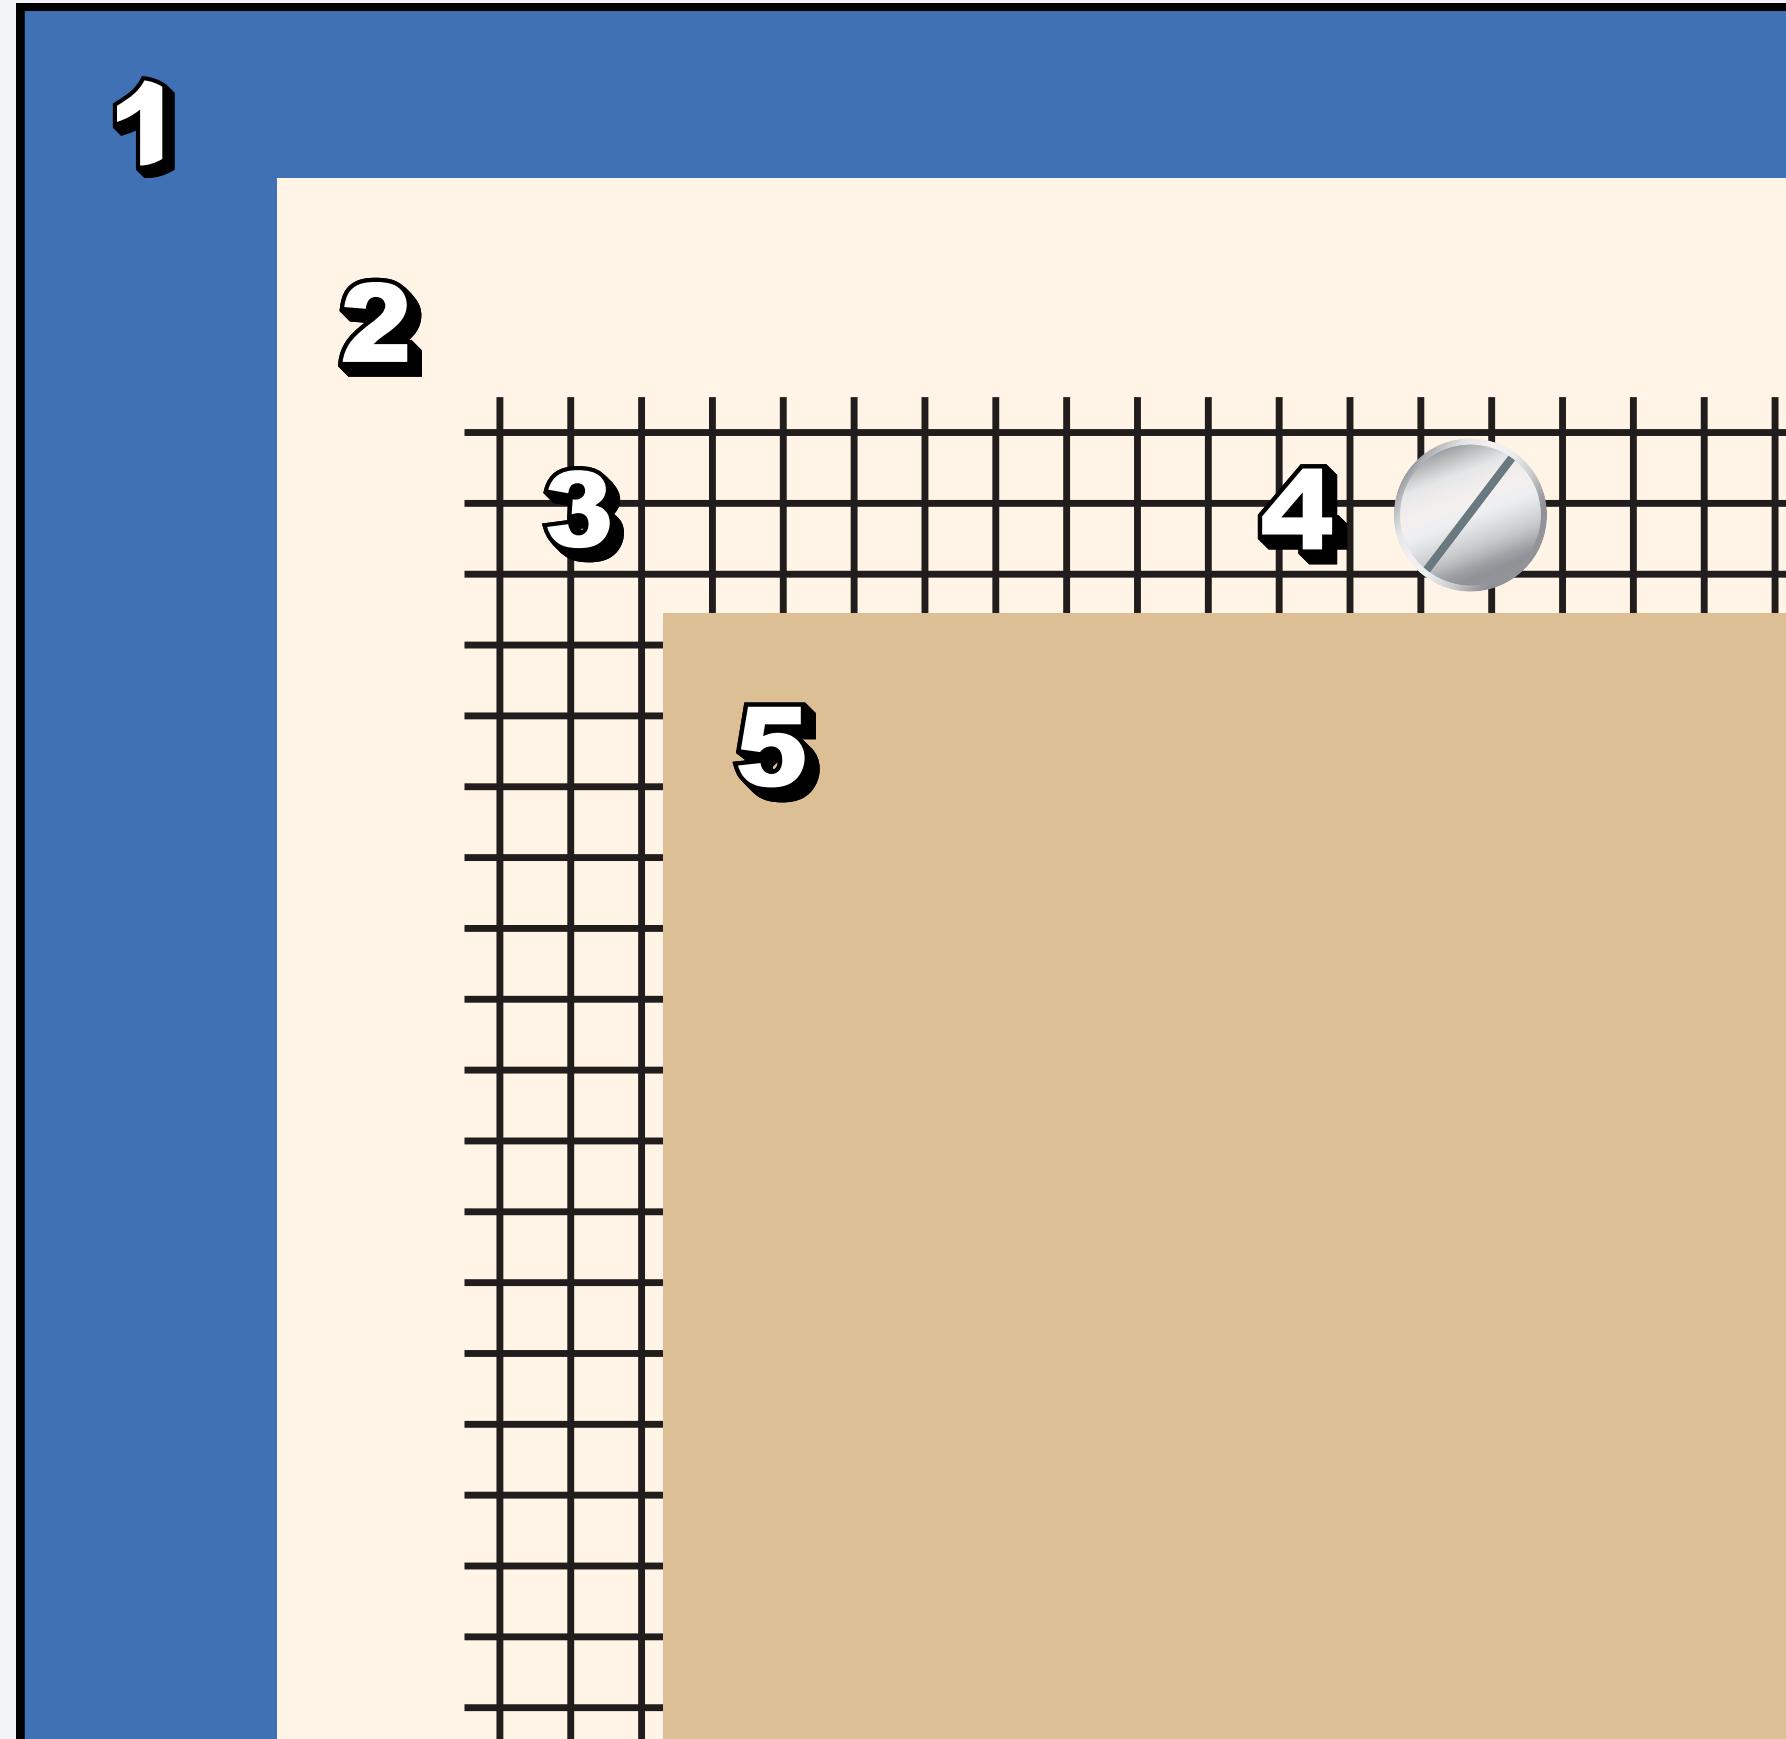

Apply a thin layer of 4-5  
mm of mortar  
ESTonetex Forte.  
And put a fiberglass  
mesh on top, then put  
fixing anchors.  
After a few minutes,  
scratch the surface and  
wait 24 hours.

STEP 2

Once the surface is dry,  
apply mortar  
ESTonetex-TXT or  
ESTonetex Park, with  
the necessary thickness.

STEP 3

1. Styrofoam plate
2. ESTonetex Forte (4-5 mm)
3. Fiberglass mesh (82 gr)
4. Fixing anchors (70 mm)
5. ESTonetex TXT / Park (1-20 cm)

Consumption Forte: 8,3 kg x sqm

Consumption TXT: 1,5 - 2 bags x sqm

# GYMPSUM AND PAINTED WALLS

Clean the surface from  
dust and dirt.  
Apply a thin layer of 4-5  
mm of mortar  
ESTonetex Forte.

STEP 1

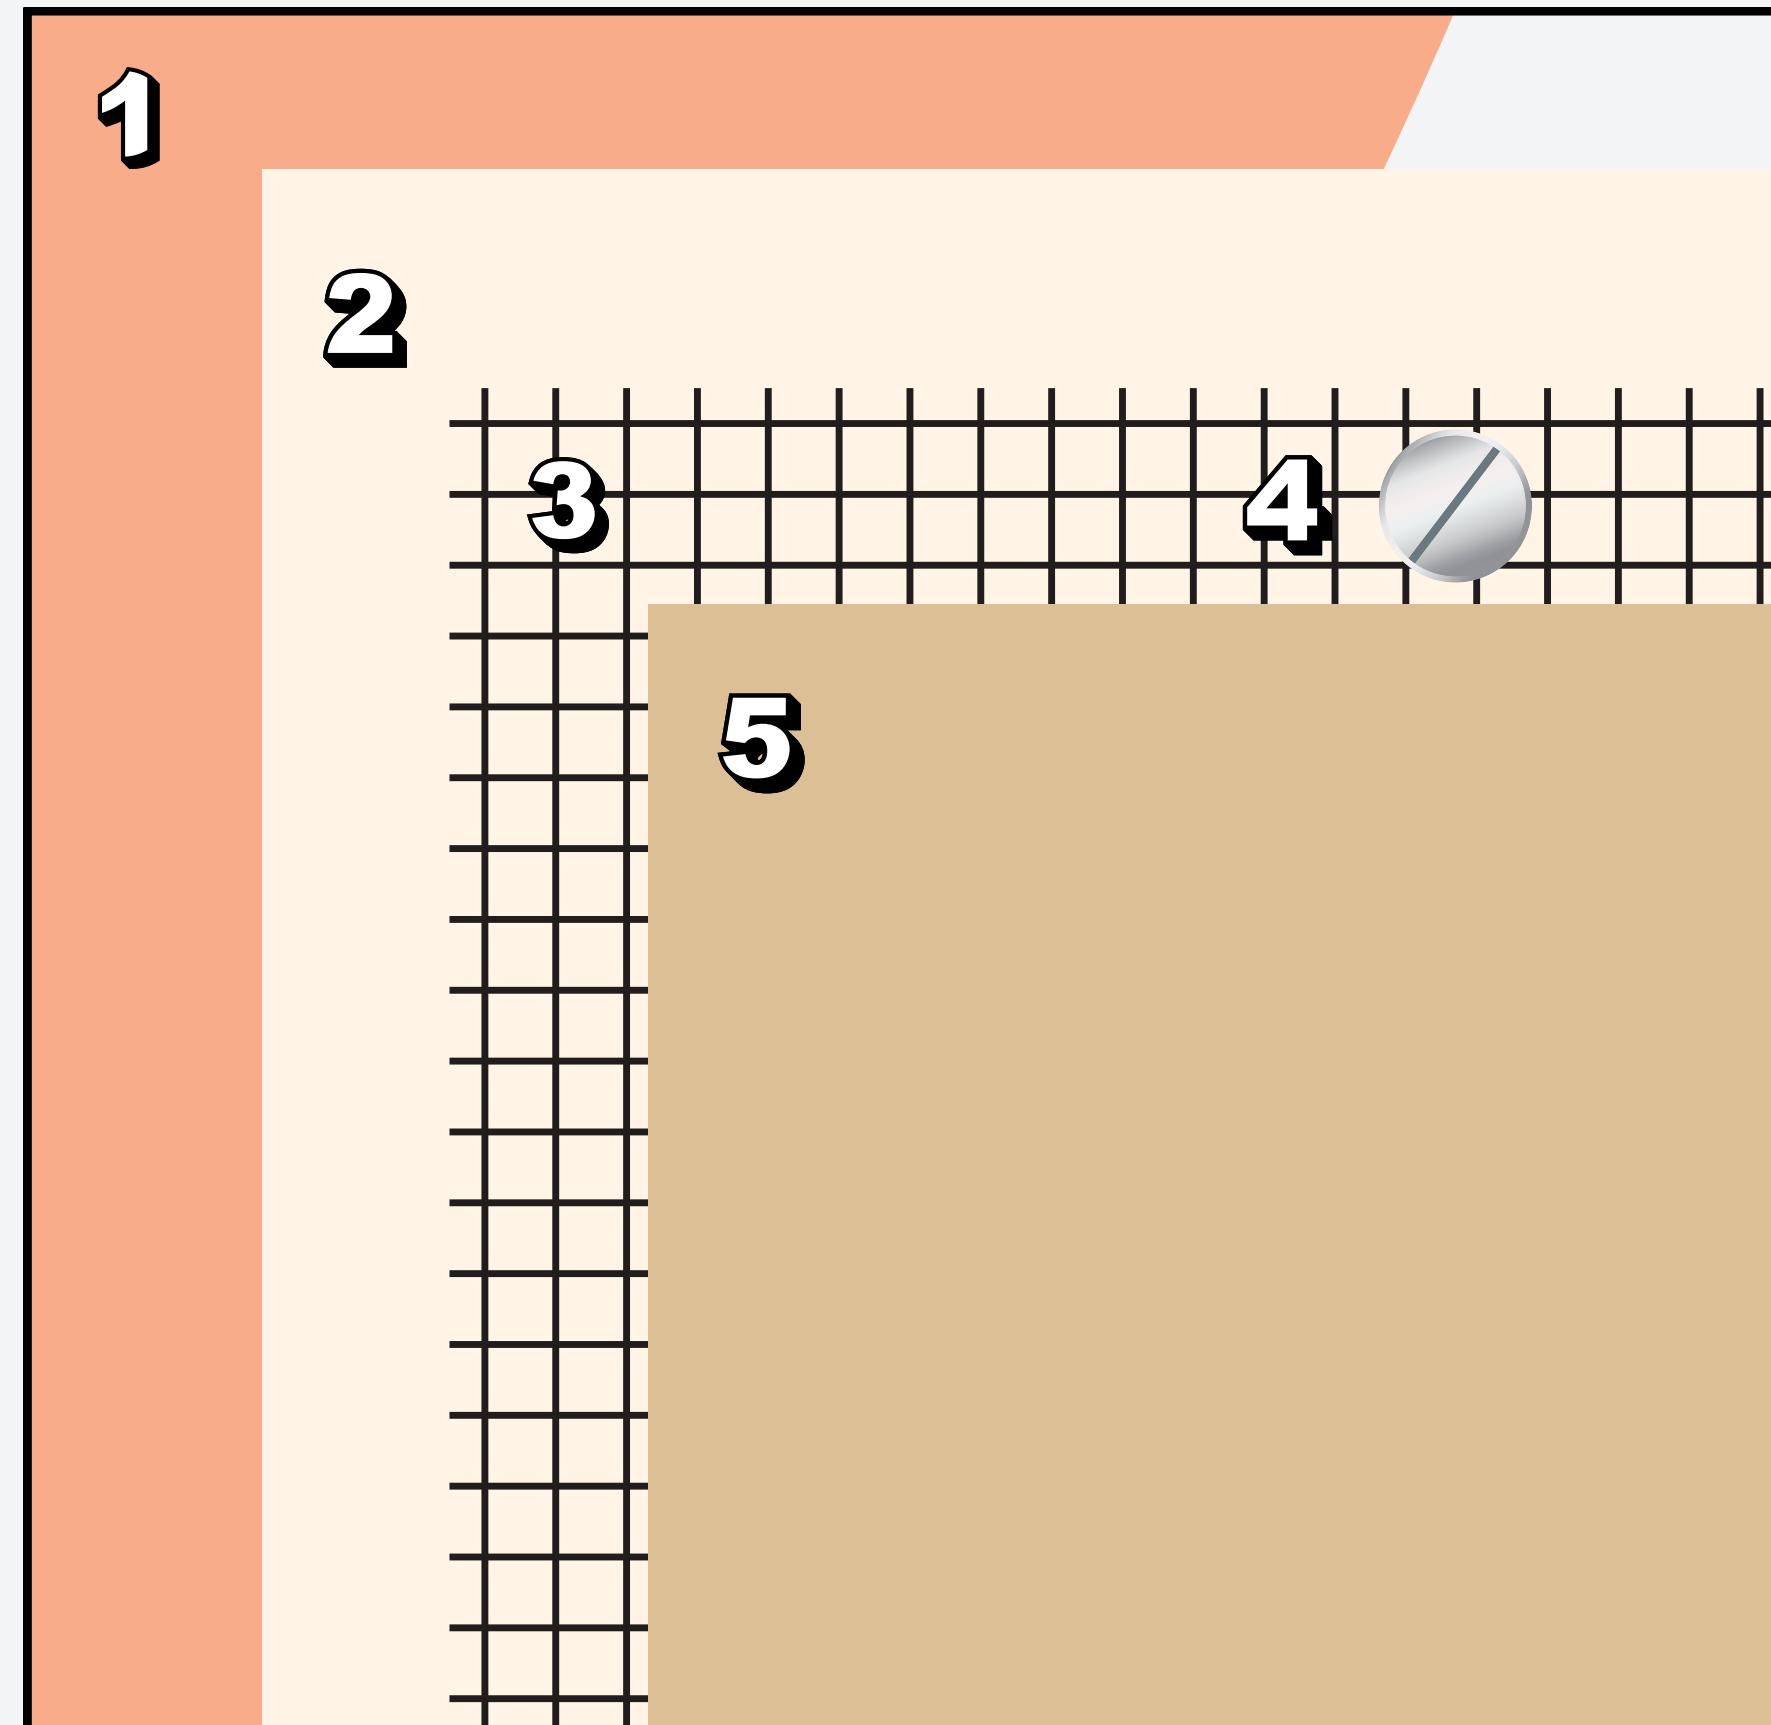

Put fiberglass mesh on  
top, then put fixing  
anchors. After a few  
minutes, scratch the  
surface and wait 24  
hours.

STEP 2

Once the surface is dry,  
apply mortar  
ESTonetex-TXT or  
ESTonetex Park, with  
the necessary thickness.

STEP 3

1. Gympsum/Painted wall
2. ESTonetex Forte (4-5 mm)
3. Fiberglass mesh (82 gr)
4. Fixing anchors (70mm)
5. ESTonetex TXT / Park (1-20 cm)

Consumption Forte: 8,3 kg x sqm

Consumption TXT: 1,5 - 2 bags x sqm

# POOLS AND WATERFALLS

## *Pools*

- The pools and waterfalls are the most common theming works
- The structure use to be made with styrofoam, iron or brick and concrete

- For this kind of works, we can use:
  - ESTonetex Sulfo
  - ESTonetex Extreme

## *Waterfalls*

# STYROFOAM STRUCTURE

Scratch the styrofoam  
and clean the surface.

STEP 1

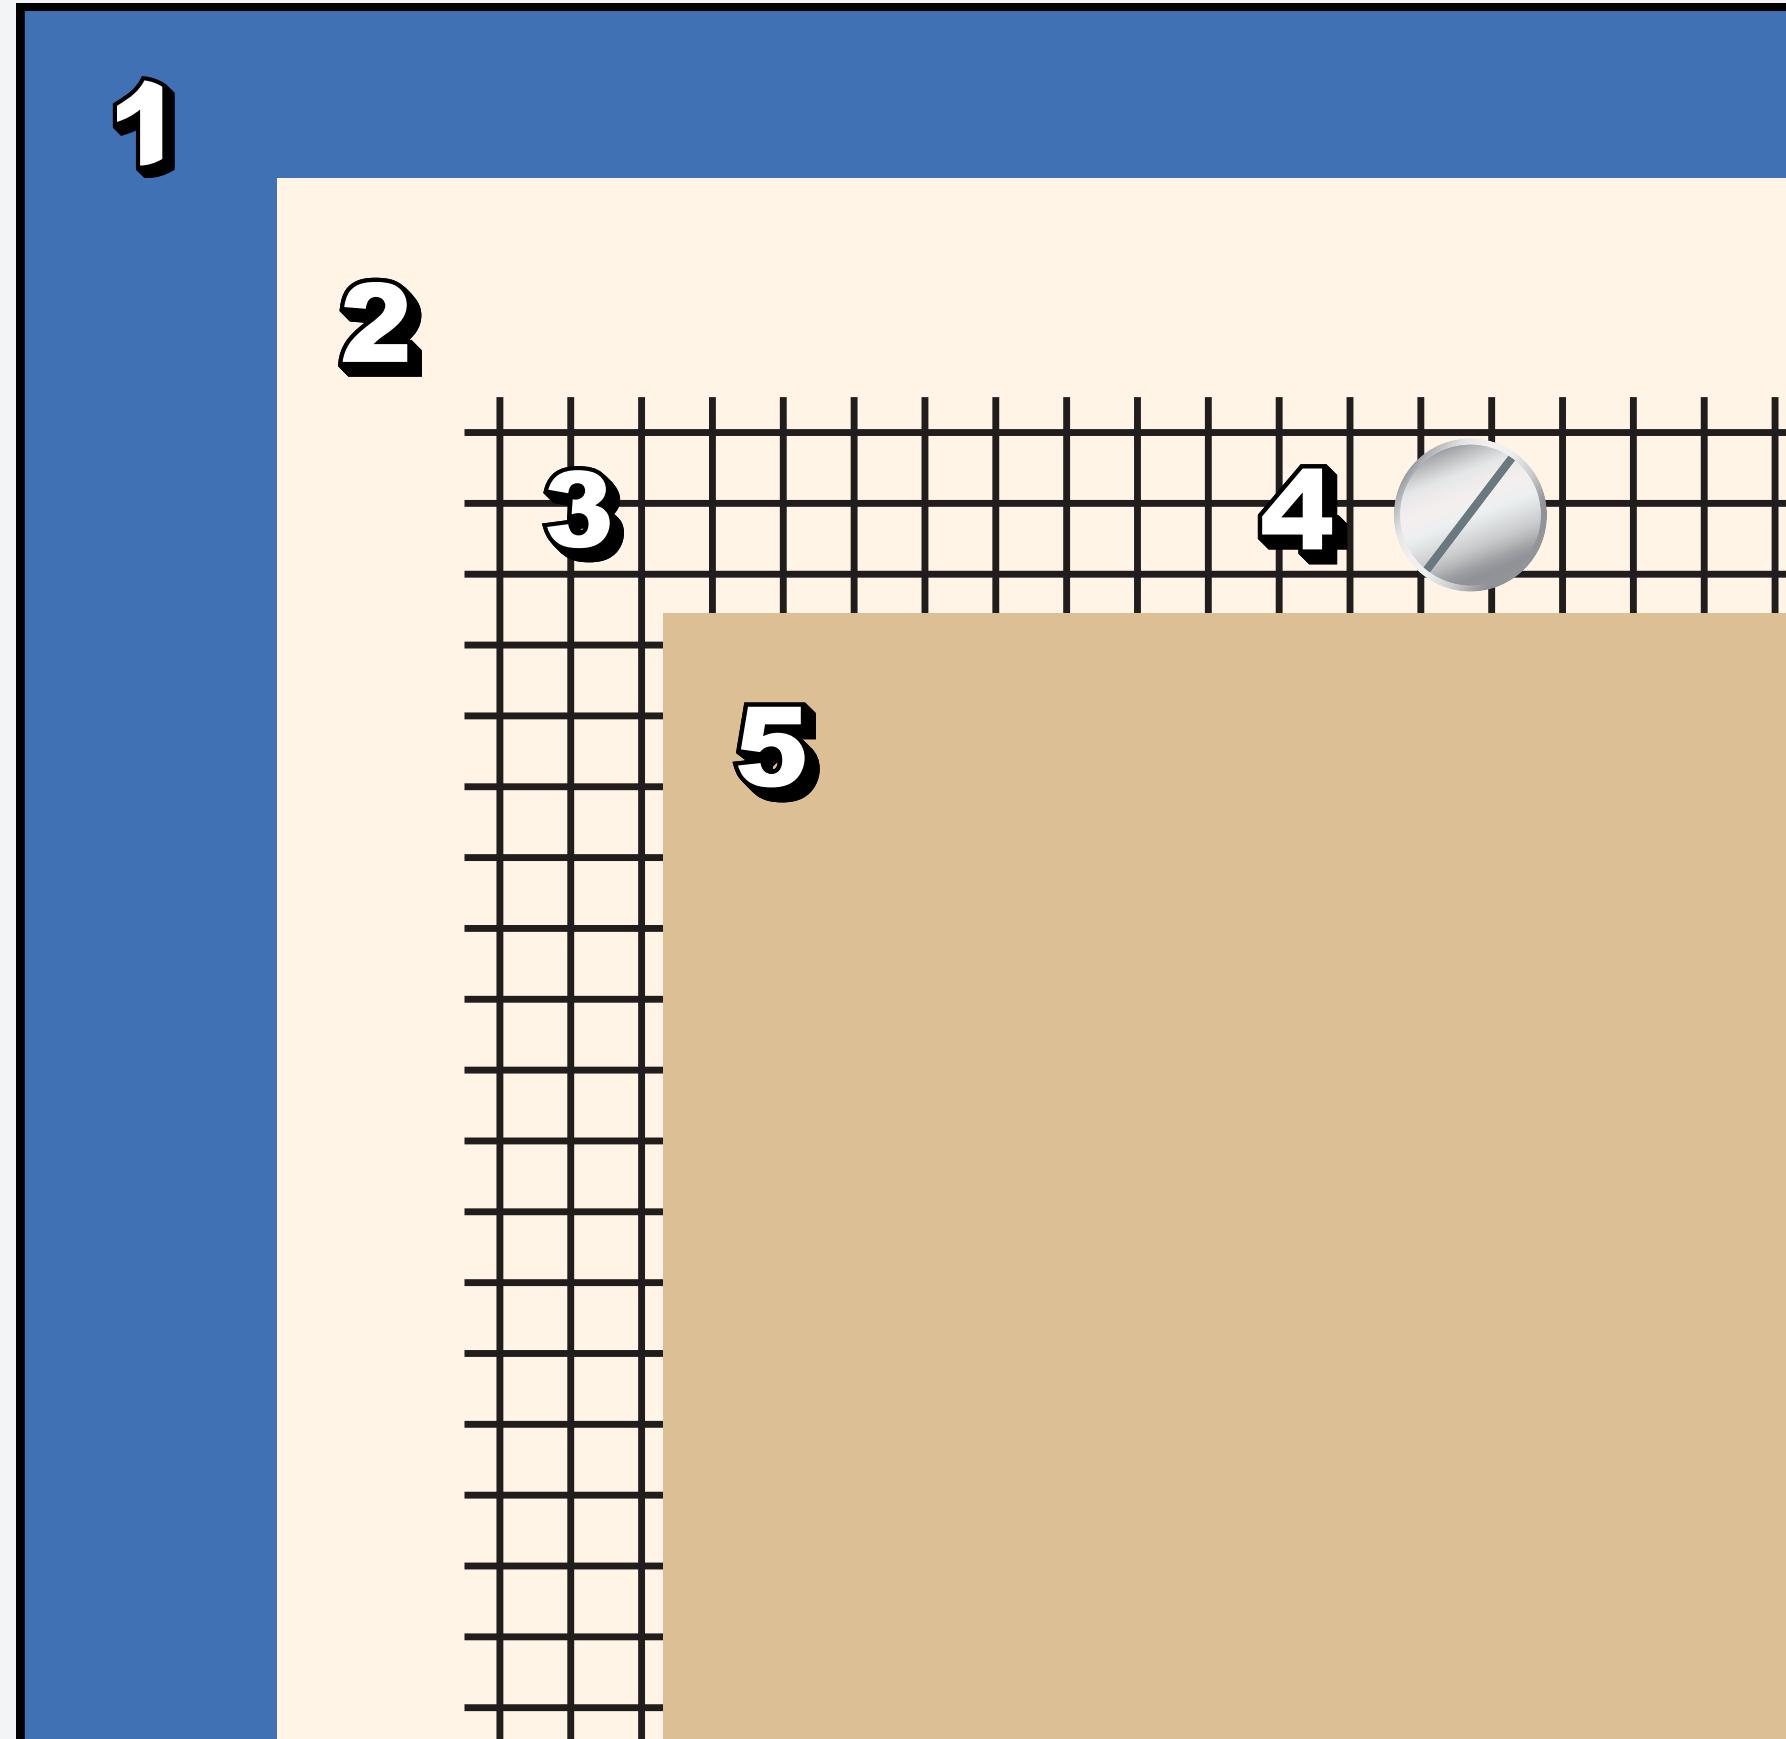

Apply a thin layer of 4-5  
mm of mortar  
ESTonetex Forte.  
And put a fiberglass  
mesh on top.  
After a few minutes,  
scratch the surface and  
wait 24 hours.

STEP 2

Once the surface is dry,  
apply mortar  
ESTonetex-Sulfo or  
ESTonetex Extreme,  
with the necessary  
thickness.

STEP 3

1. Styrofoam
2. ESTonetex Forte (4-5 mm)
3. Fiberglass mesh (82 gr)
4. Fixing anchors (70 mm)
5. ESTonetex Sulfo / Extreme (1-20 cm)

Consumption Forte: 8,3 kg x sqm

Consumption Sulfo: 2 bags x sqm

# IRON STRUCTURE

Fix the mesh on the surface with staples.

**STEP 1**

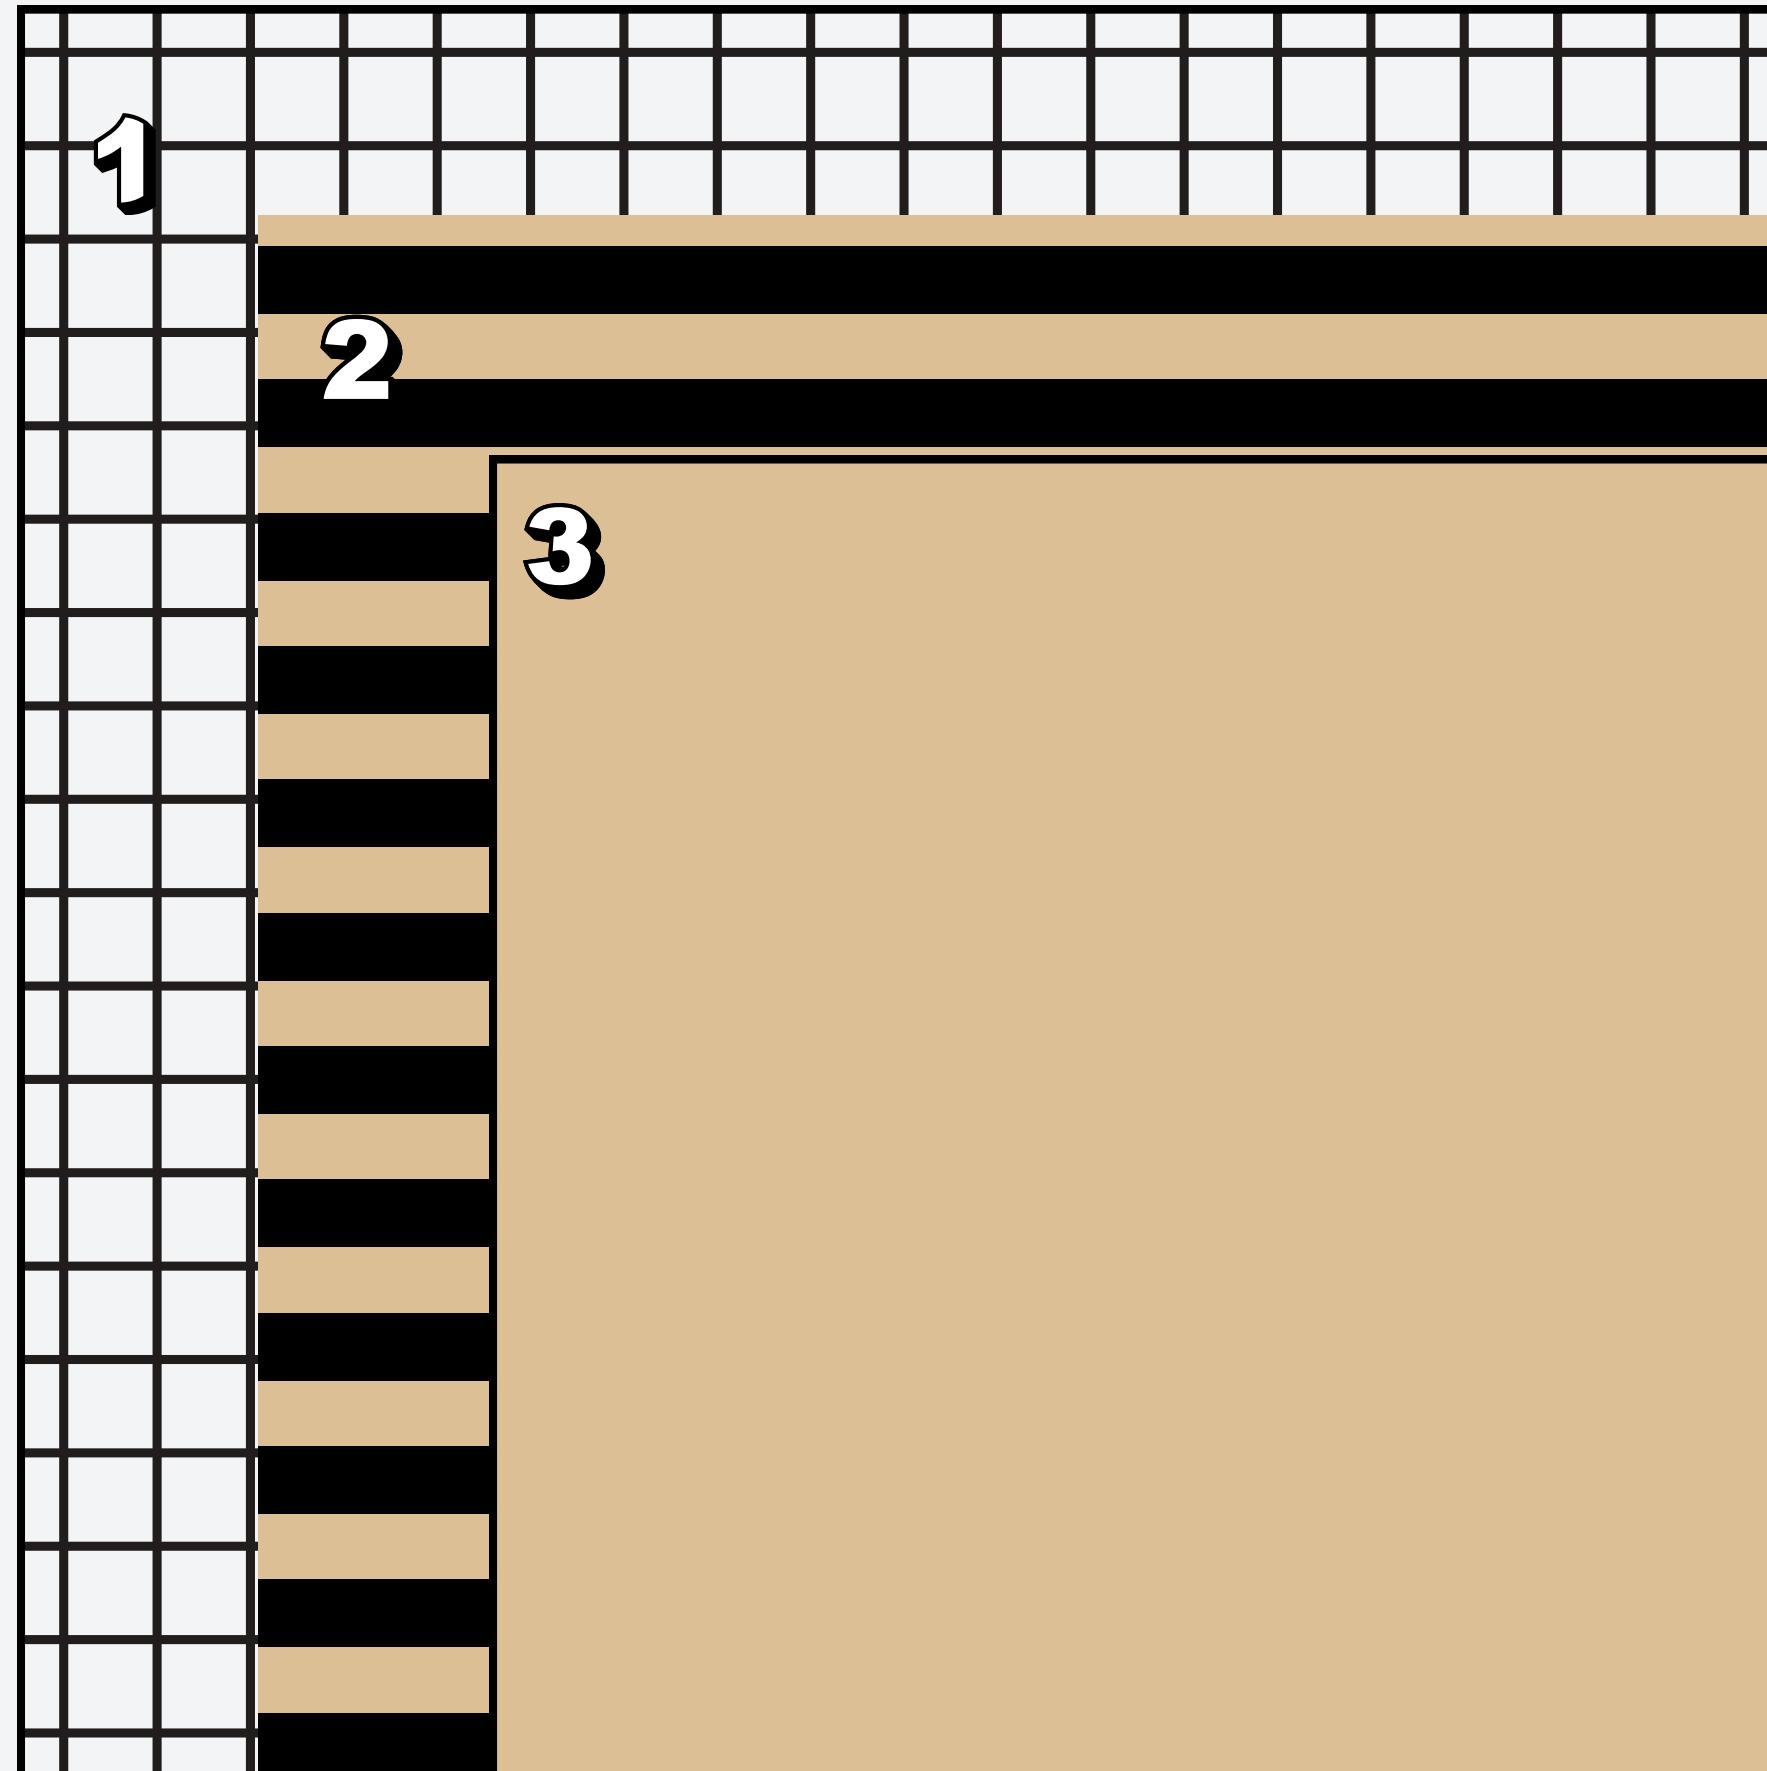

Apply a thin layer of 4-5 mm of mortar ESTonetex Sulfo or ESTonetex Extreme. After a few minutes, scratch the surface and wait 24 hours.

**STEP 2**

Once the scratch coat is dry, apply mortar ESTonetex Sulfo or ESTonetex Extreme, with the necessary thickness.

**STEP 3**

1. Mesh (fiberglass, iron or plastic)

2. ESTonetex Sulfo / Extreme (4-5  
mm)

3. ESTonetex Sulfo / Extreme (1-20  
cm)

Consumption Sulfo: 2 - 2,5 bags x sqm

# BRICK STRUCTURE

Clean the surface from  
dust and dirt.

STEP 1

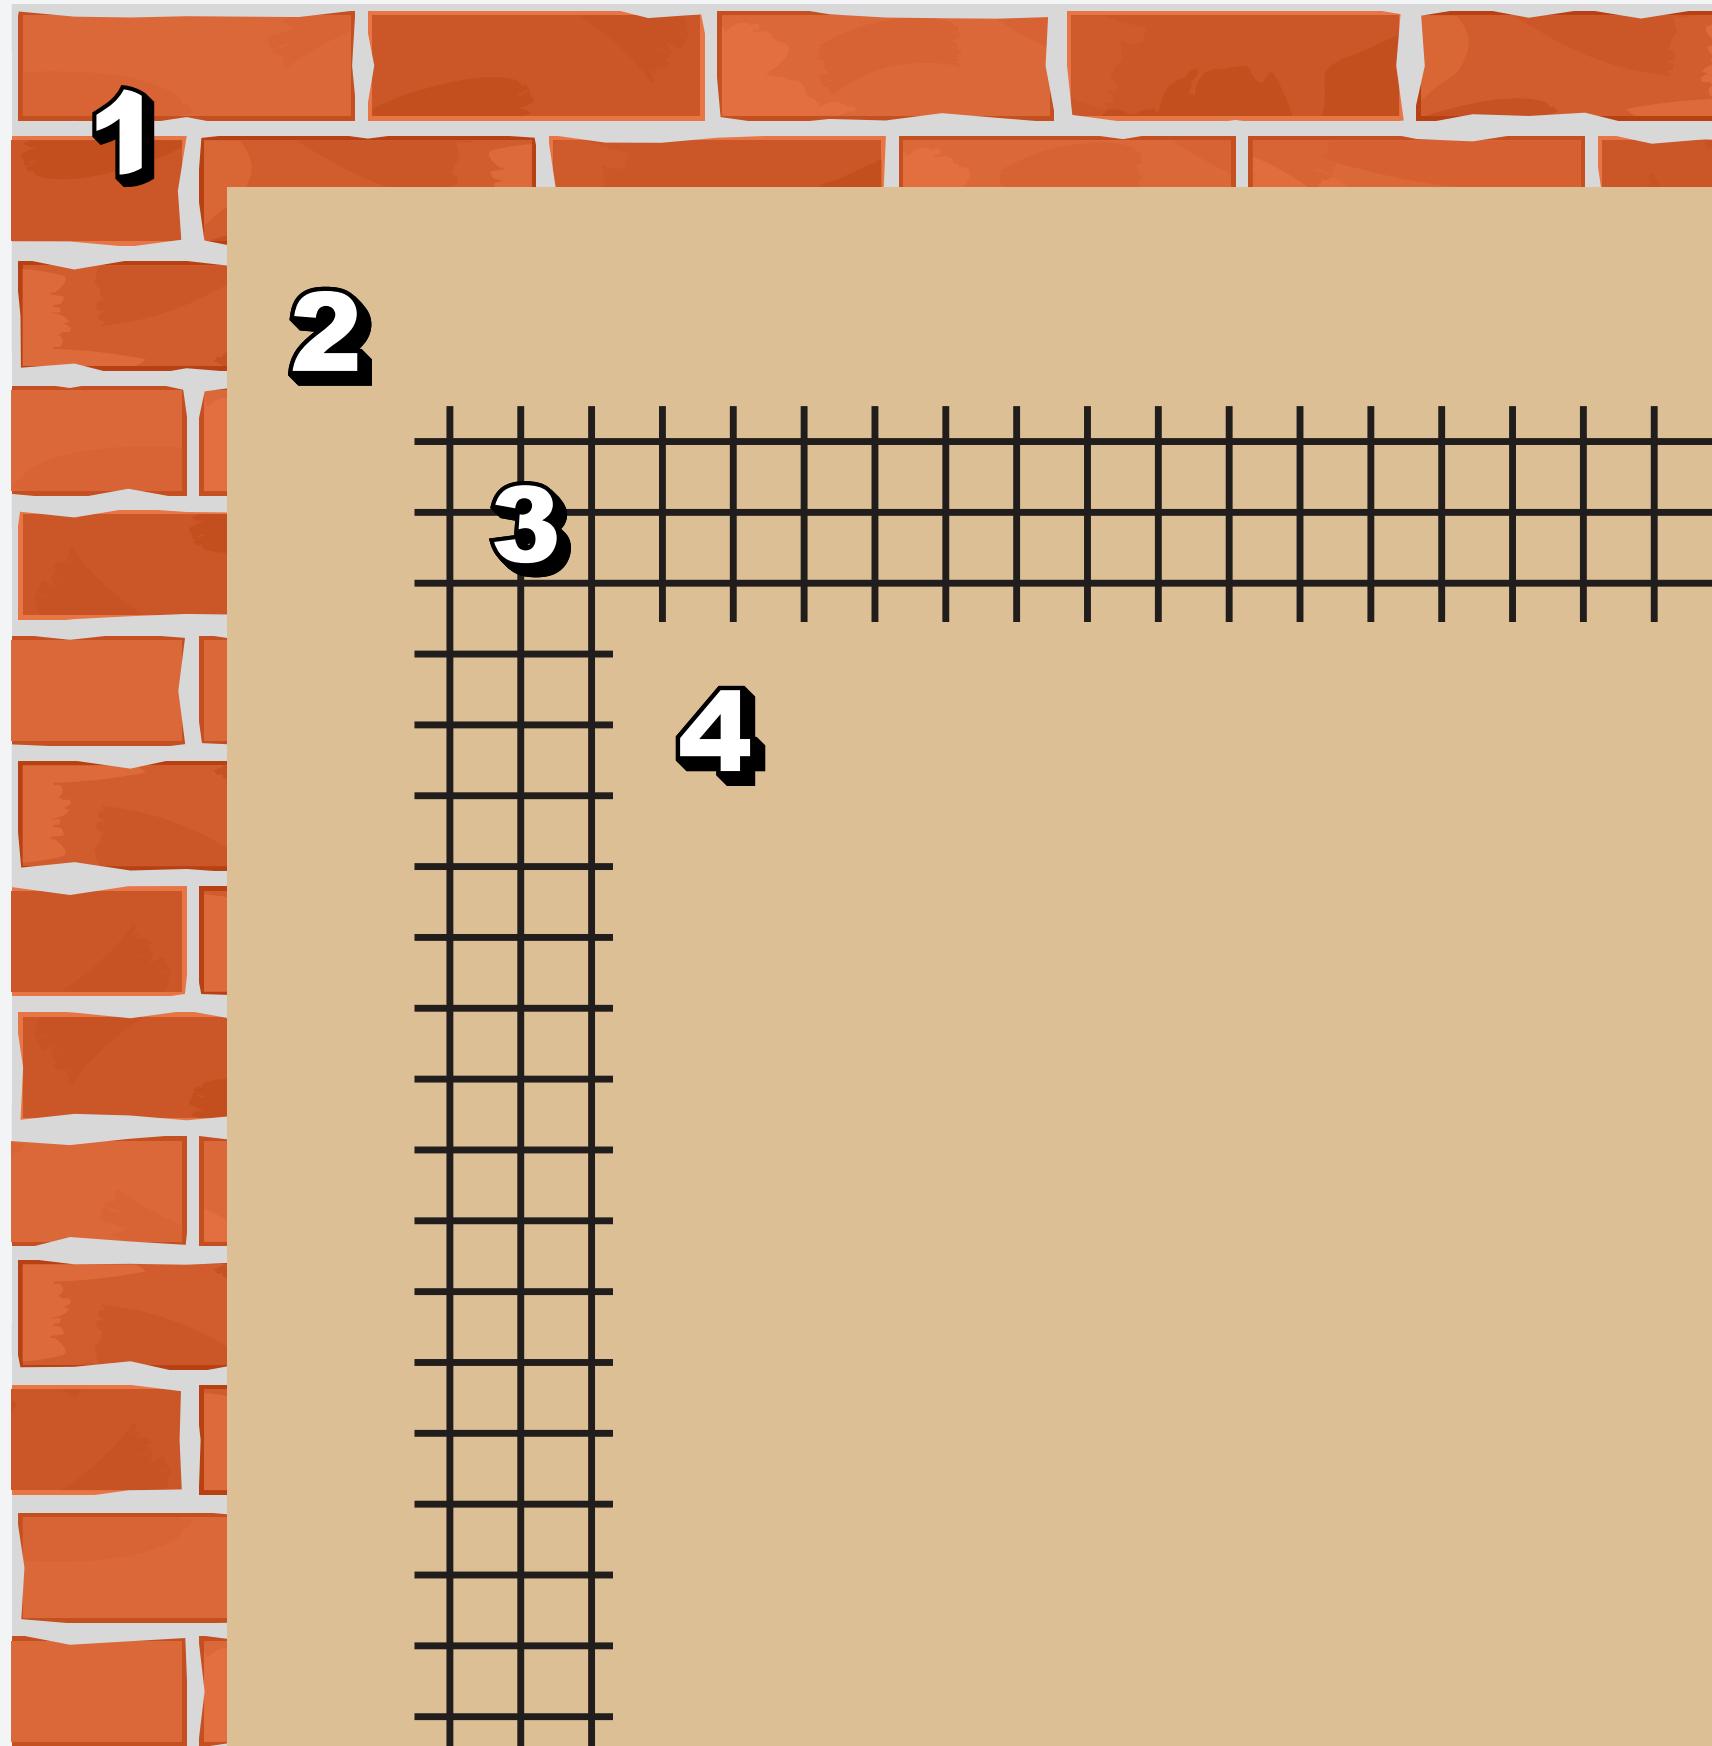

Apply a thin layer of 4-5  
mm of mortar  
ESTonetex Sulfo or  
ESTonetex Extreme.  
And put a fiberglass  
mesh on top.

STEP 2

Once the mesh is  
placed, apply mortar  
ESTonetex Sulfo or  
ESTonetex Extreme,  
with the necessary  
thickness.

STEP 3

1. Brick wall
2. ESTonetex Sulfo / Extreme (4-5 mm)
3. Fiberglass mesh (82 gr)
4. ESTonetex Sulfo / Extreme (1-20 cm)

Consumption Sulfo: 2 - 2,5 bags x sqm

# COUNTERTOPS

## *Sinks*

- The countertops have a lot of demand right now
- On the top, we need to make the surface stronger to prevent damages

- For this kind of works, we can use:
  - ESTonetex TXT + EST-EPS
  - ESTonetex TXT

## *Countertops*

# BRICK/CONCRETE STRUCTURE

Clean the surface from  
dust and dirt.

STEP 1

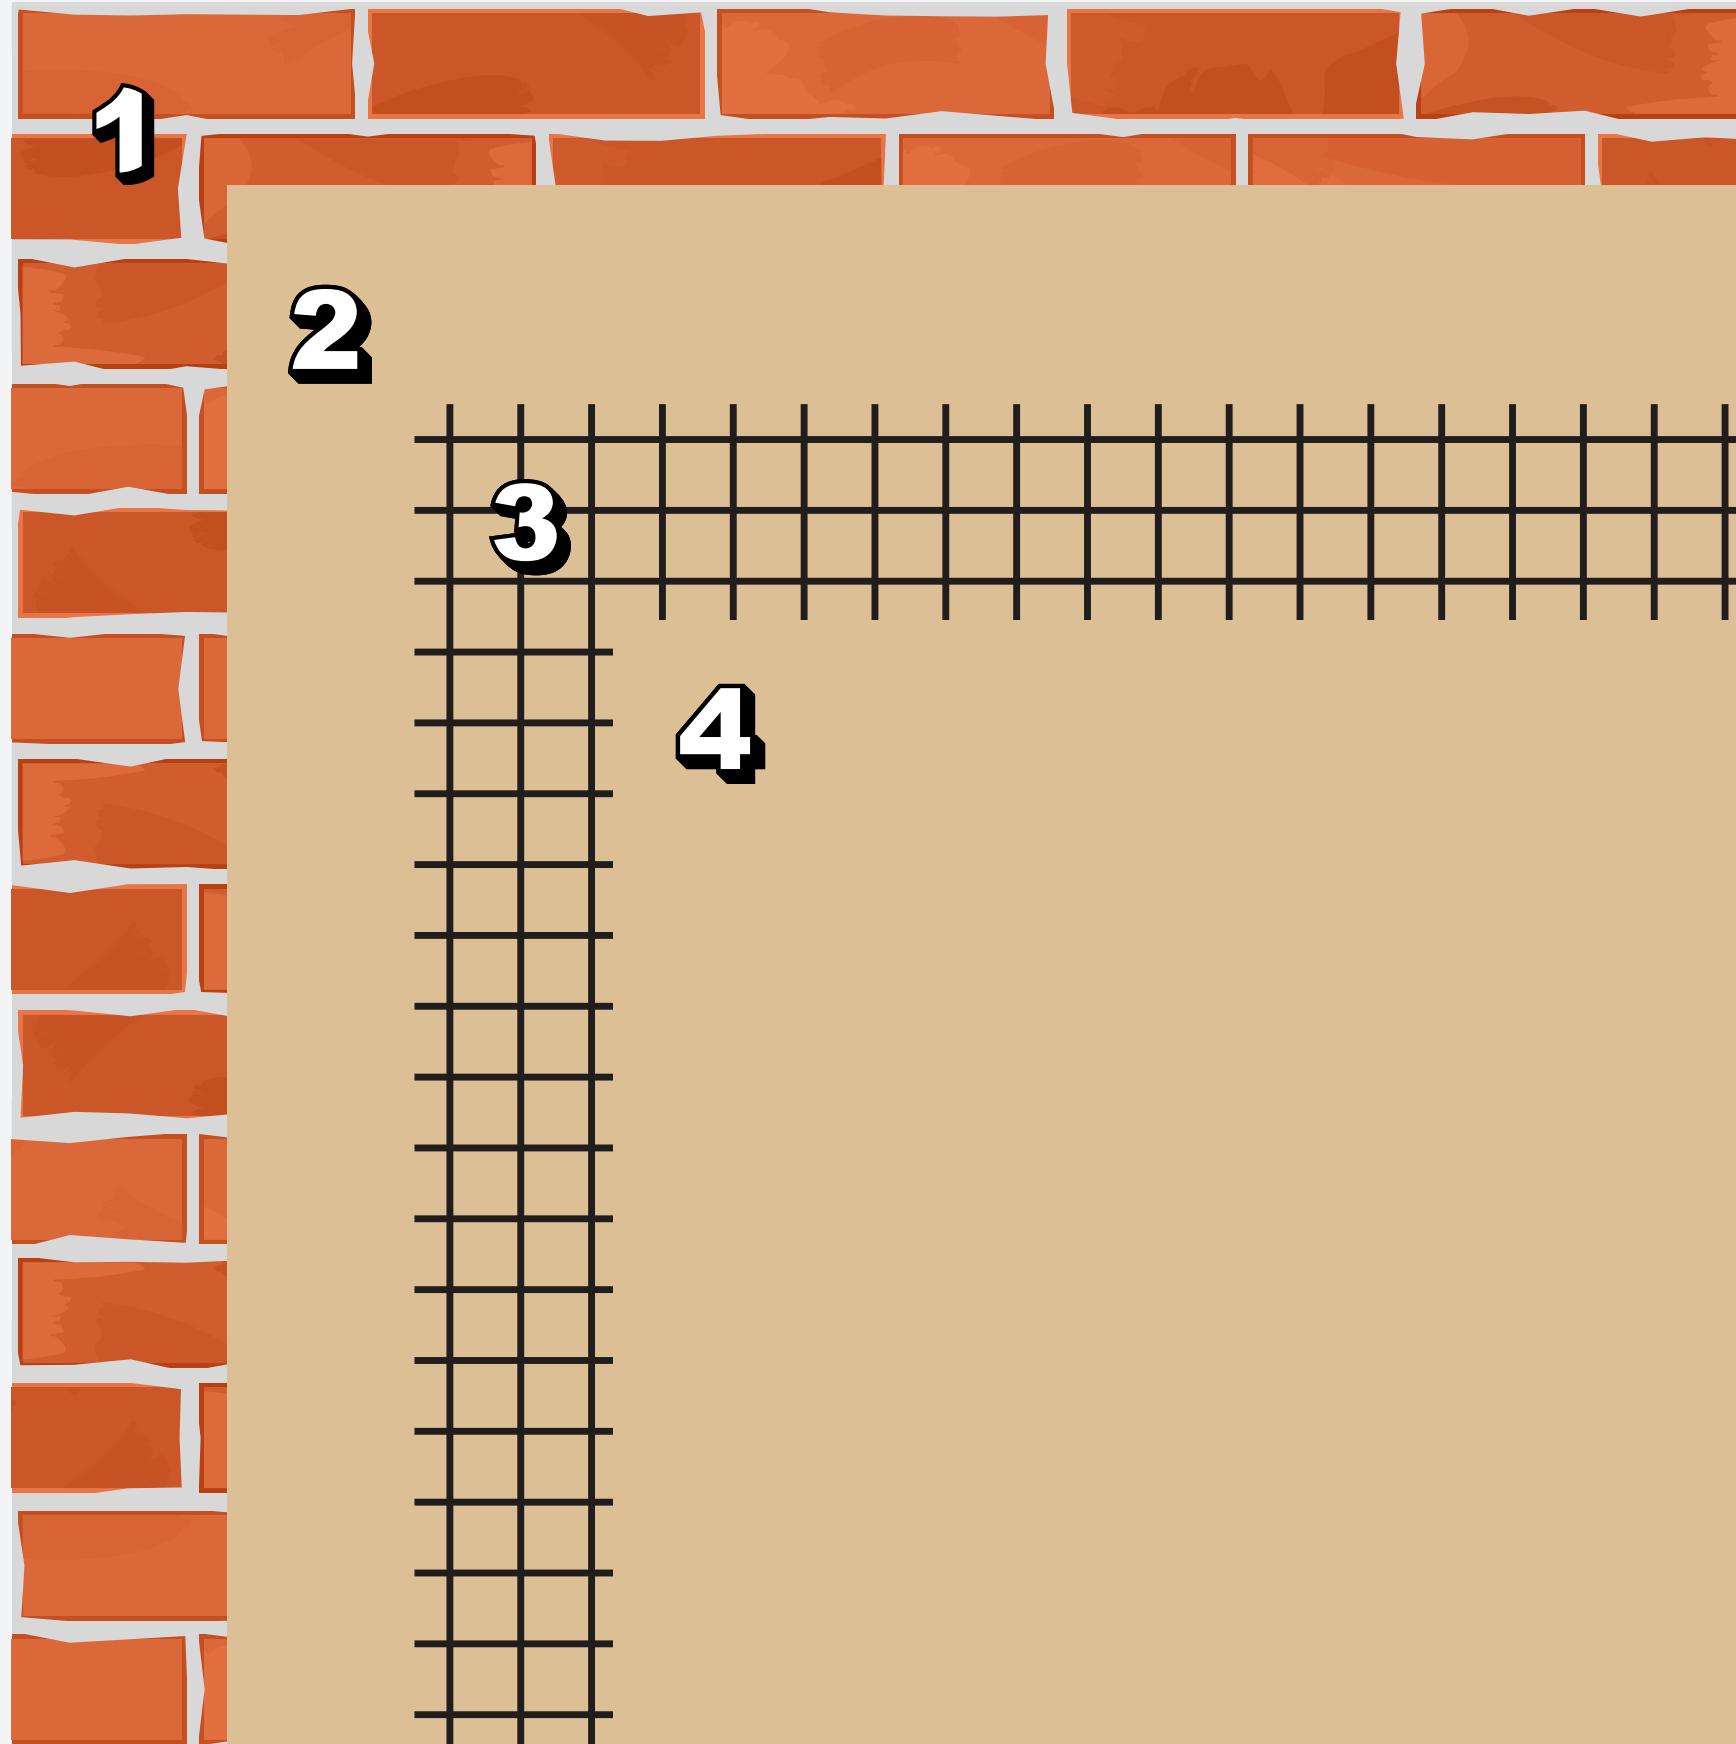

Apply a thin layer of 4-5  
mm of mortar  
ESTonetex TXT.  
And put a fiberglass  
mesh on top.

STEP 2

Once the scratch coat is  
dry, apply mortar  
ESTonetex-TXT.  
On the top we have to  
mix ESTonetex TXT with  
ESTonetex EPS (resin).

STEP 3

1. Brick wall
2. ESTonetex TXT (4-5 mm)
3. Fiberglass mesh (82 gr)
4. ESTonetex TXT (1-20 cm)

Consumption TXT: 1,5 - 2 bags x sqm

# PLASTERBOARD

Apply a thin layer of 4-5 mm of mortar ESTonetex Forte.

**STEP 1**

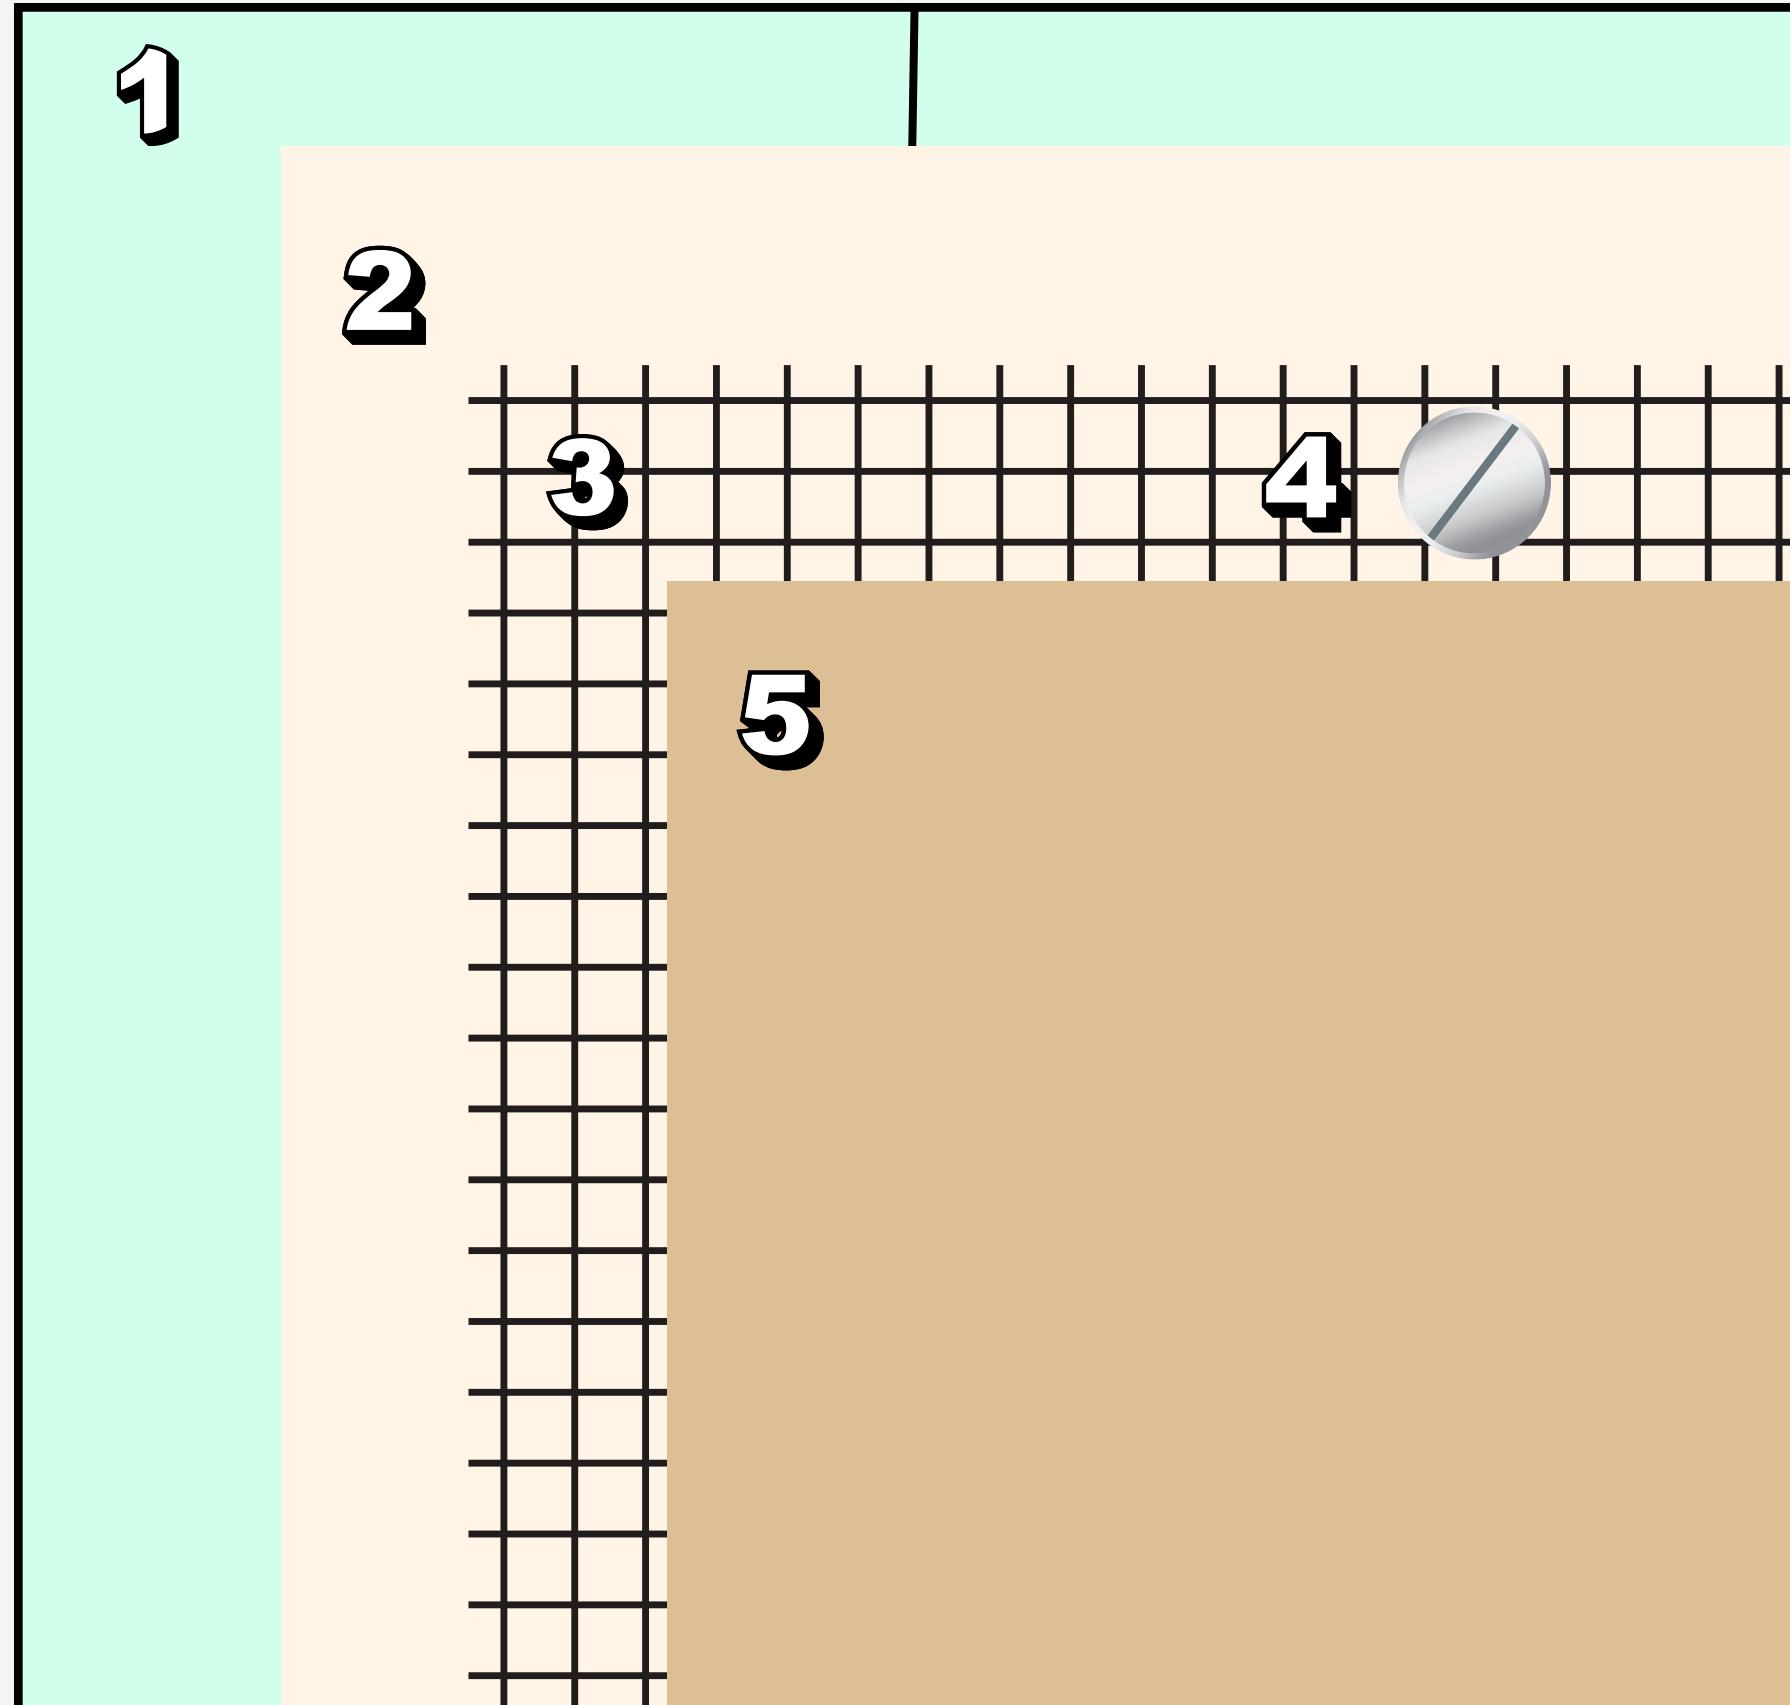

Put fiberglass mesh on top, then put screws. After a few minutes, scratch the surface and wait 24 hours.

**STEP 2**

Once the first layer is dry, apply mortar ESTonetex-TXT with the necessary thickness. On the top we have to mix ESTonetex TXT with ESTonetex EPS (resin).

**STEP 3**

1. Plasterboard wall
2. ESTonetex Forte (4-5 mm)
3. Fiberglass mesh (82 gr)
4. Screws (with wide washer)
5. ESTonetex TXT (1-20 cm)

Consumption Forte: 8,3 kg x sqm

Consumption TXT: 1,5 - 2 bags x sqm

# STYROFOAM (EPS-XPS)

Scratch the styrofoam and clean the surface.

STEP 1

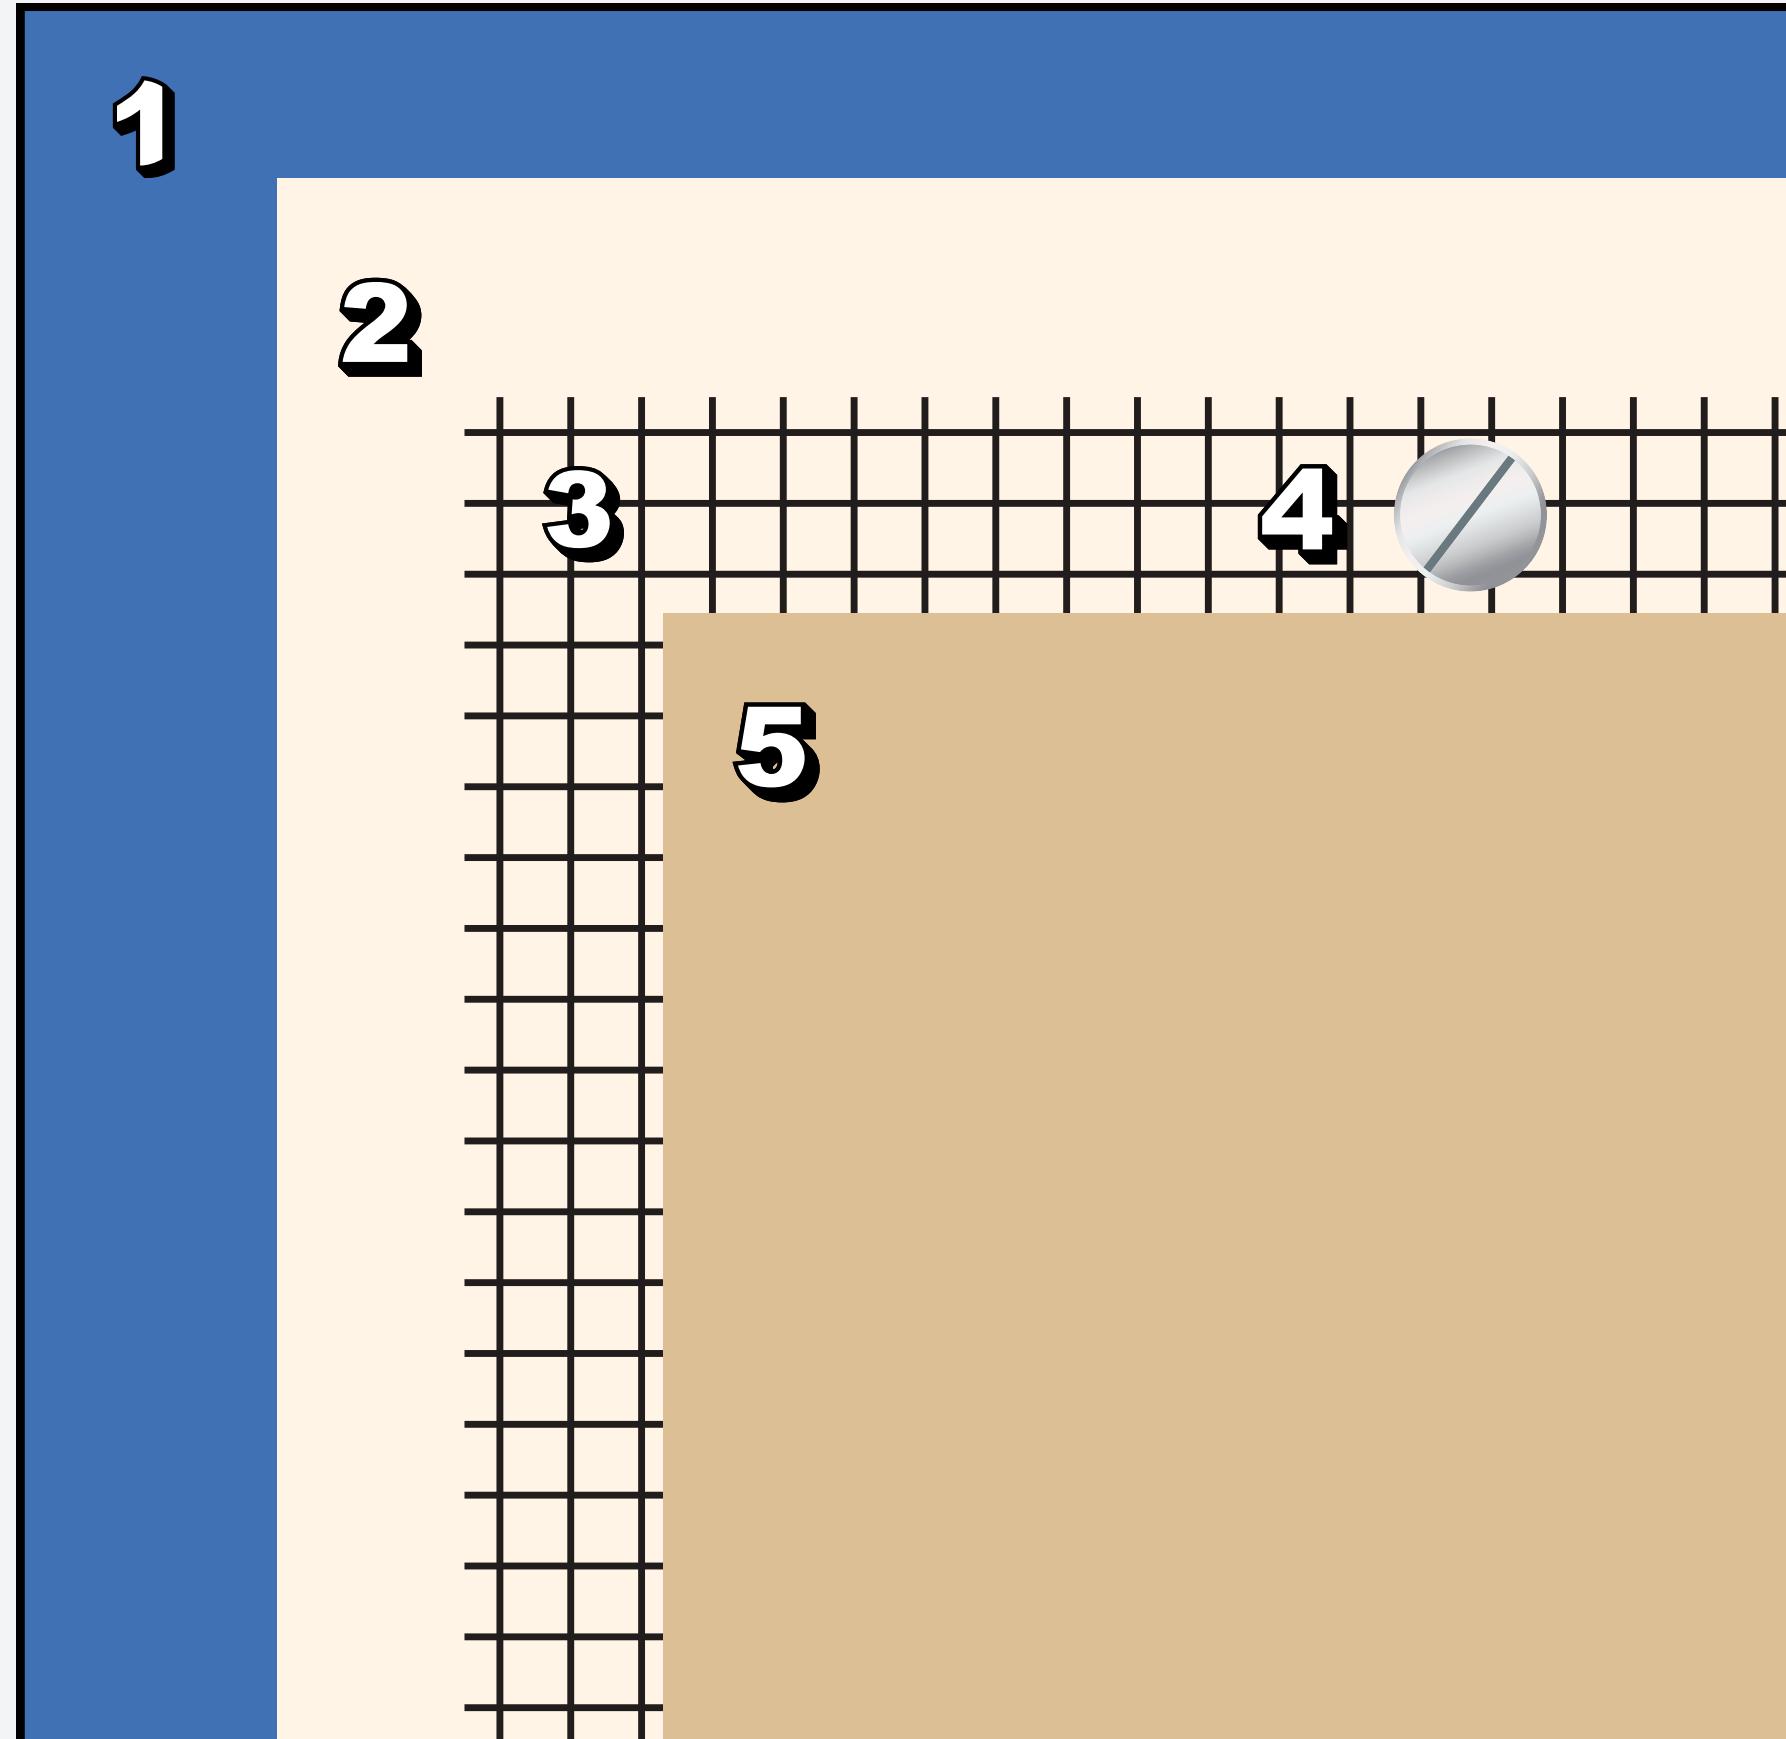

Apply a thin layer of 4-5 mm of mortar ESTonetex Forte. And put a fiberglass mesh on top, then put fixing anchors. After a few minutes, scratch the surface and wait 24 hours.

STEP 2

Once the first layer is dry, apply mortar ESTonetex-TXT with the necessary thickness. On the top we have to mix ESTonetex TXT with ESTonetex EPS (resin).

STEP 3

1. Styrofoam plate
2. ESTonetex Forte (4-5 mm)
3. Fiberglass mesh (82 gr)
4. Fixing anchors (70 mm)
5. ESTonetex TXT / Park (1-20 cm)

Consumption Forte: 8,3 kg x sqm

Consumption TXT: 1,5 - 2 bags x sqm

# IRON STRUCTURE

Fix the mesh on the surface with staples.

**STEP 1**

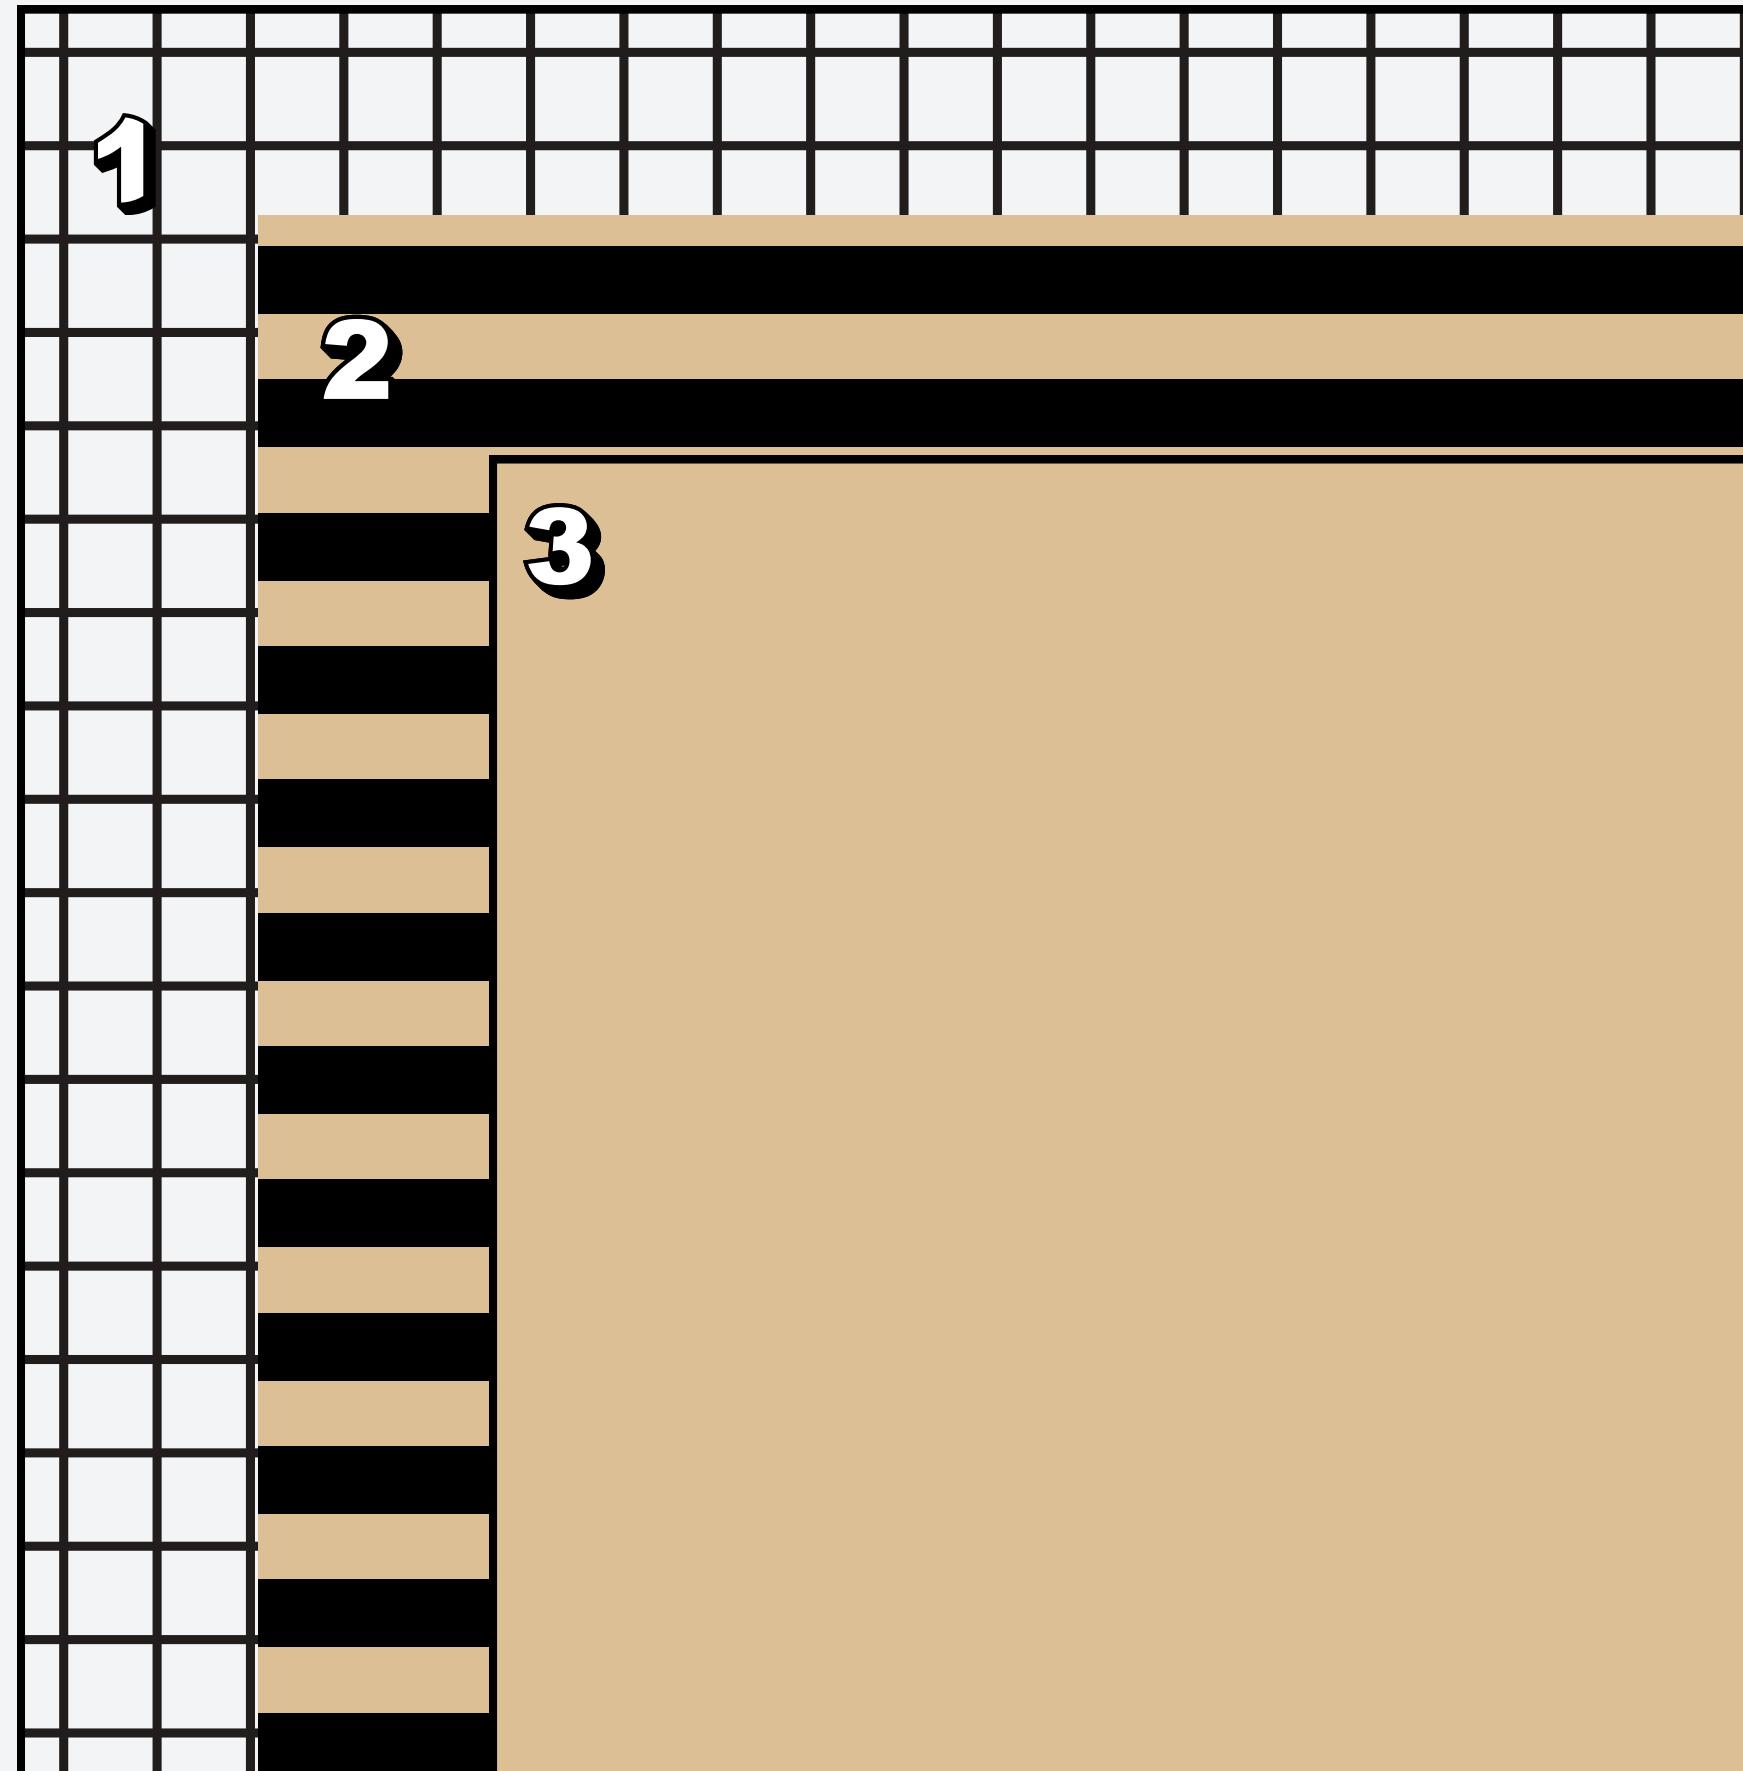

Apply a thin layer of 4-5 mm of mortar ESTonetex TXT. After a few minutes, scratch the surface and wait 24 hours.

**STEP 2**

Once the scratch coat is dry, apply mortar ESTonetex TXT. On the top we have to mix ESTonetex TXT with ESTonetex EPS (resin).

**STEP 3**

1. Mesh (fiberglass, iron or plastic)
2. ESTonetex TXT (4-5 mm)
3. ESTonetex TXT (1-20 cm)

Consumption TXT: 1,5 - 2 bags x sqm

# DM BOARD

Fix plasterboard plates with screws.  
Then apply a layer of 3-4 mm of ESTonetex Forte

**STEP 1**

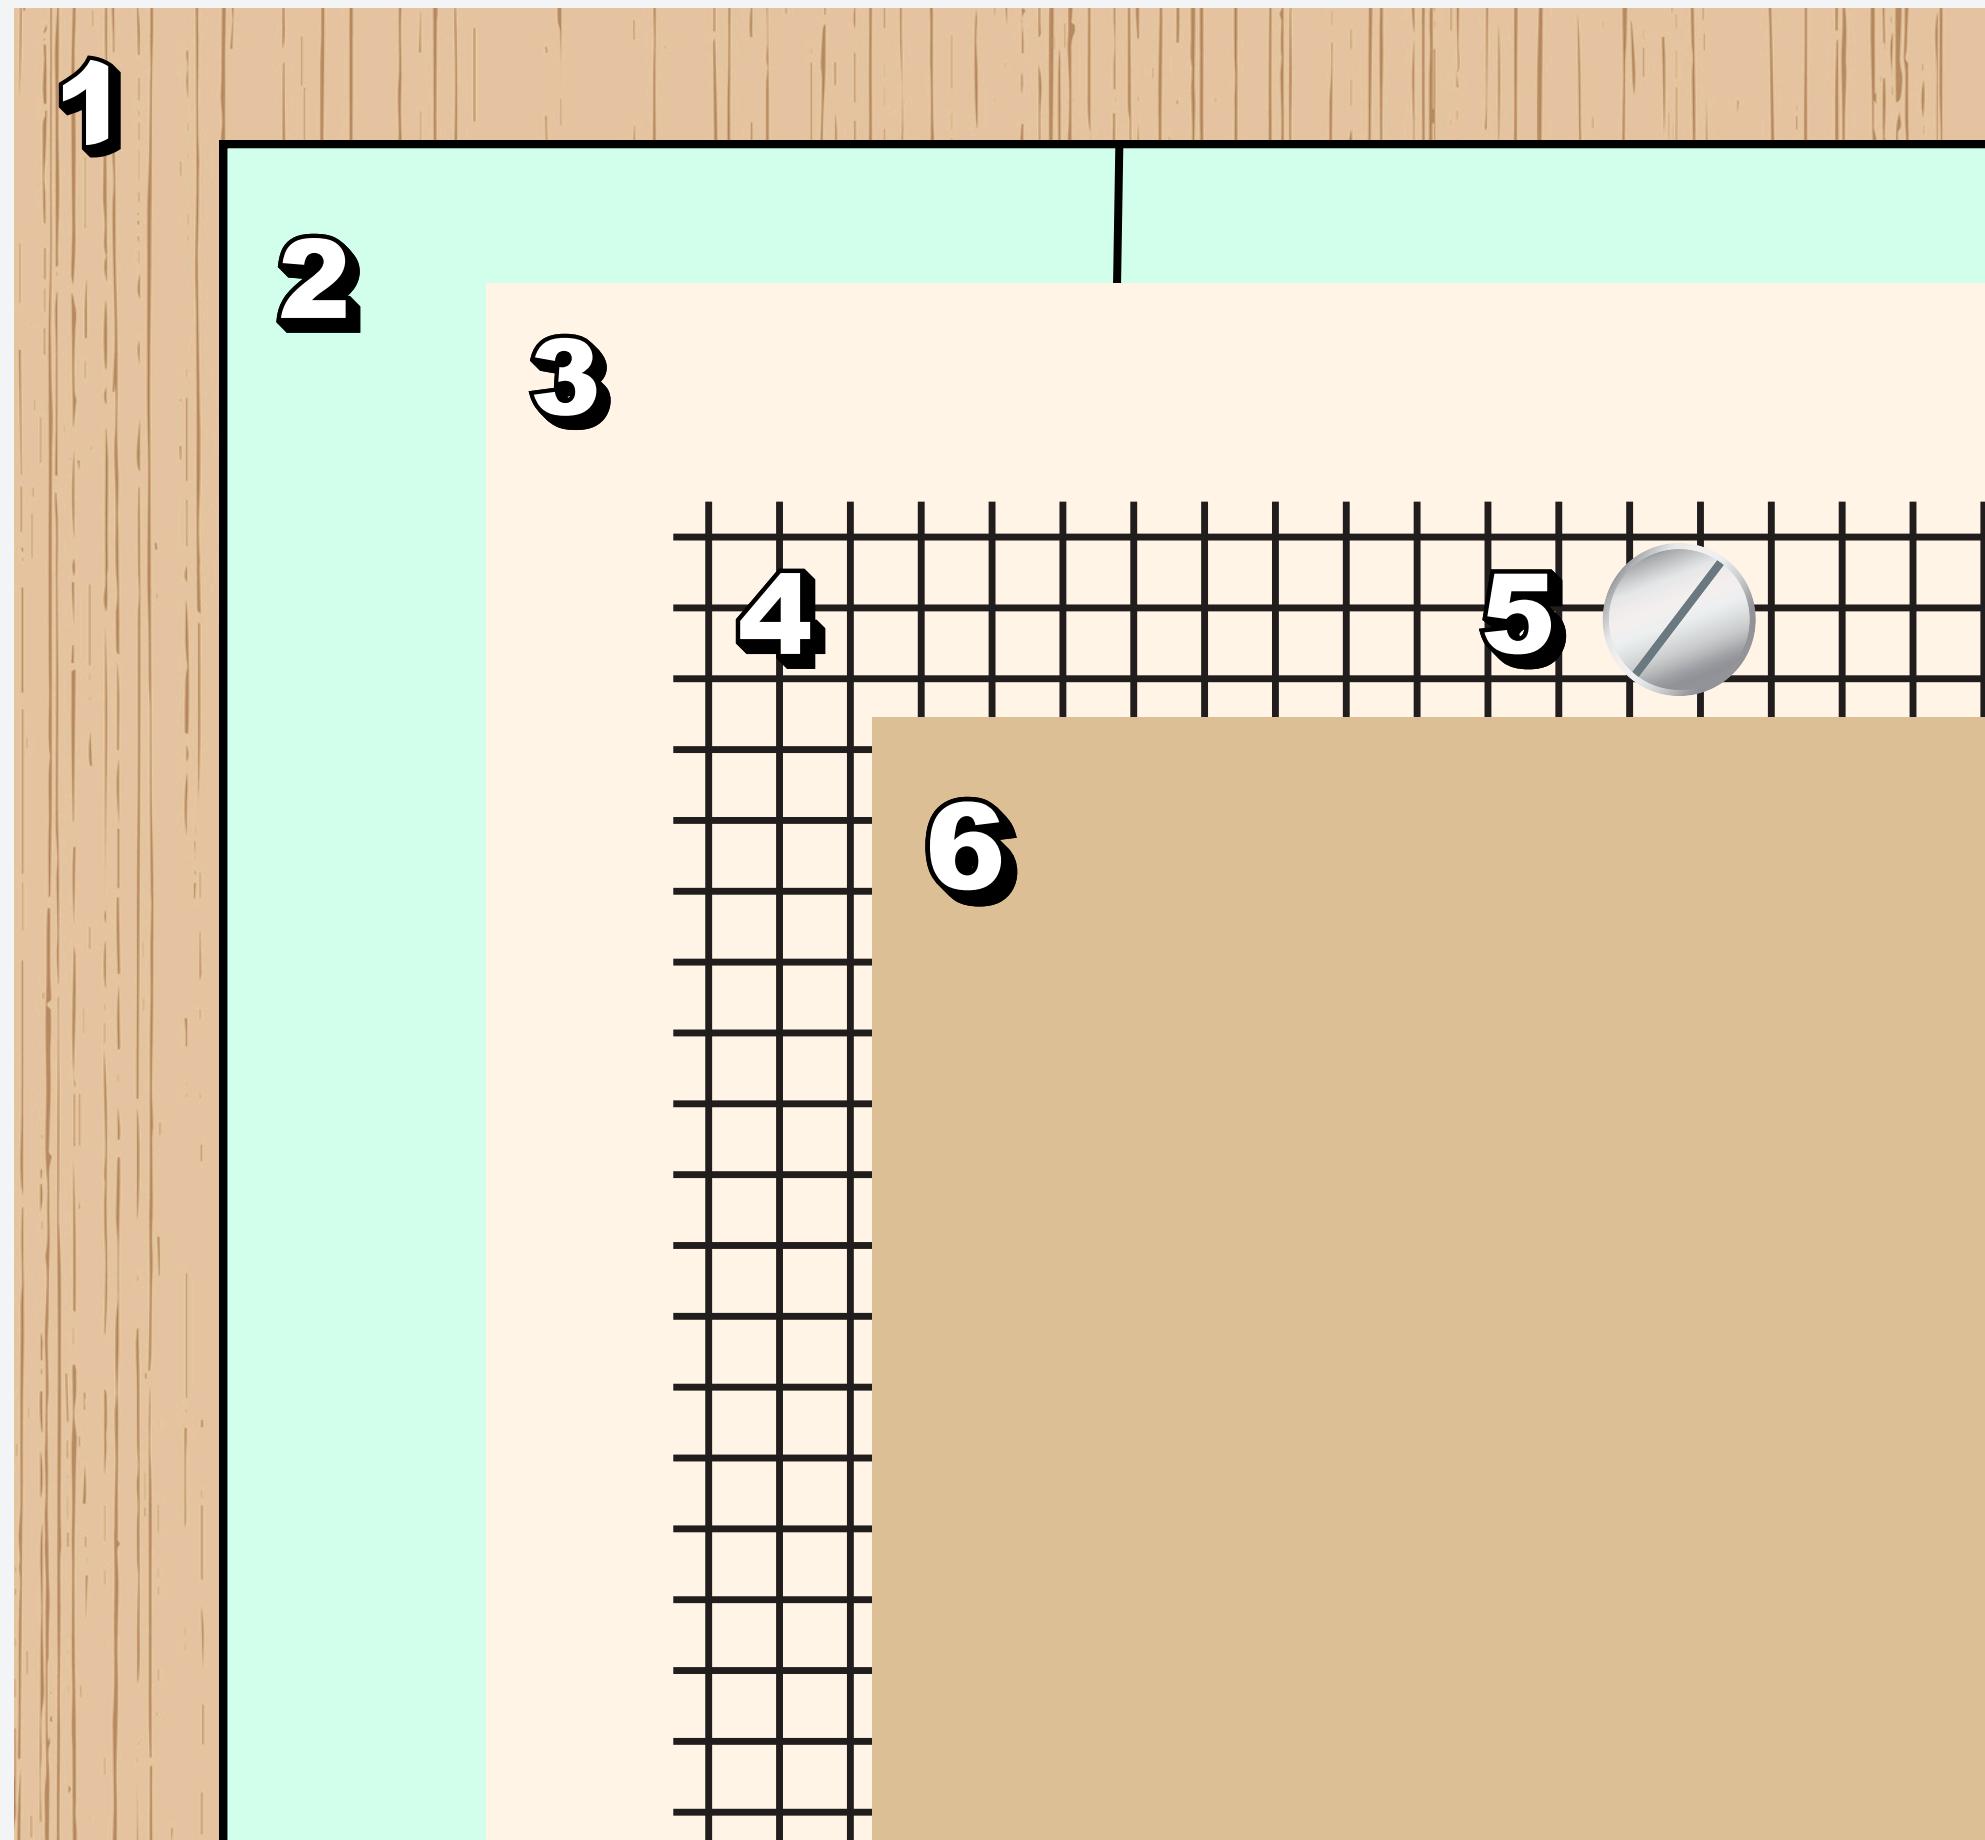

Put fiberglass mesh on top, then put screws.  
After a few minutes, scratch the surface and wait 24 hours.

**STEP 2**

Once the first layer is dry, apply mortar ESTonetex-TXT with the necessary thickness.  
On the top we have to mix ESTonetex TXT with ESTonetex EPS (resin).

**STEP 3**

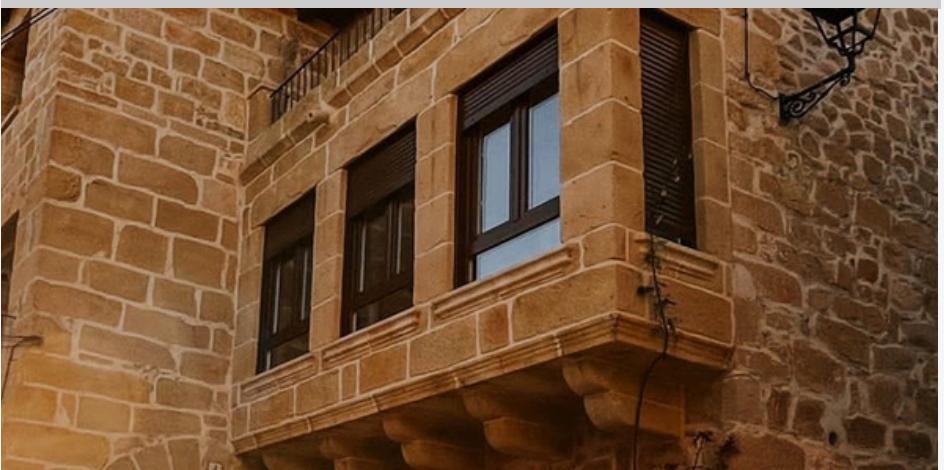

1. DM board wall
2. Plasterboard plate
3. ESTonetex Forte (4-5 mm)
4. Fiberglass mesh (82 gr)
5. Screws (with wide washer)
6. ESTonetex TXT (1-20 cm)

Consumption Forte: 8,3 kg x sqm  
Consumption TXT: 1,5 - 2 bags x sqm

# RESTORATION

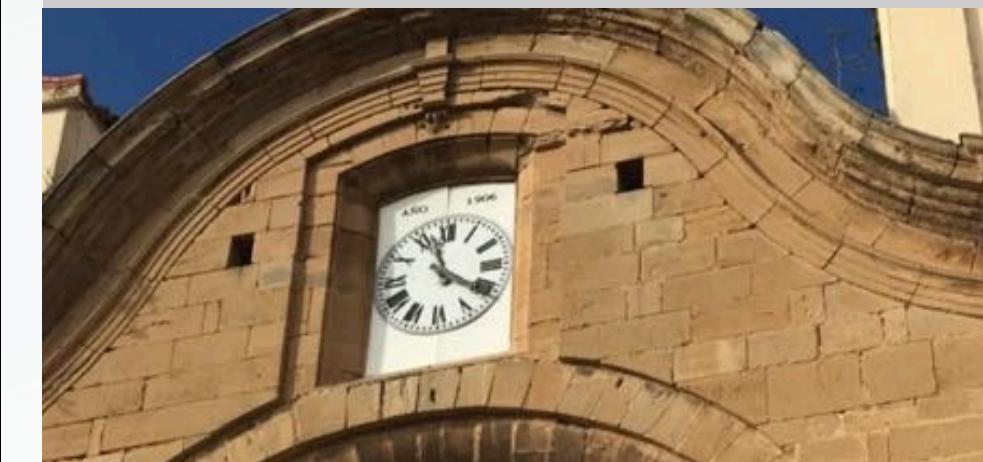

## *Walls*

- Before applying the mortars, some surface preparation guidelines must be followed
- In this cases the most common surfaces are natural stone or brick

- For this kind of works, we can use:  
-ESTonetex Restaura + EST-26 Multilite

## *Historical Heritage*

# NATURAL STONE

Clean the surface from  
dust and dirt.  
Apply EST-12 and clean  
the surface with water.

STEP 1

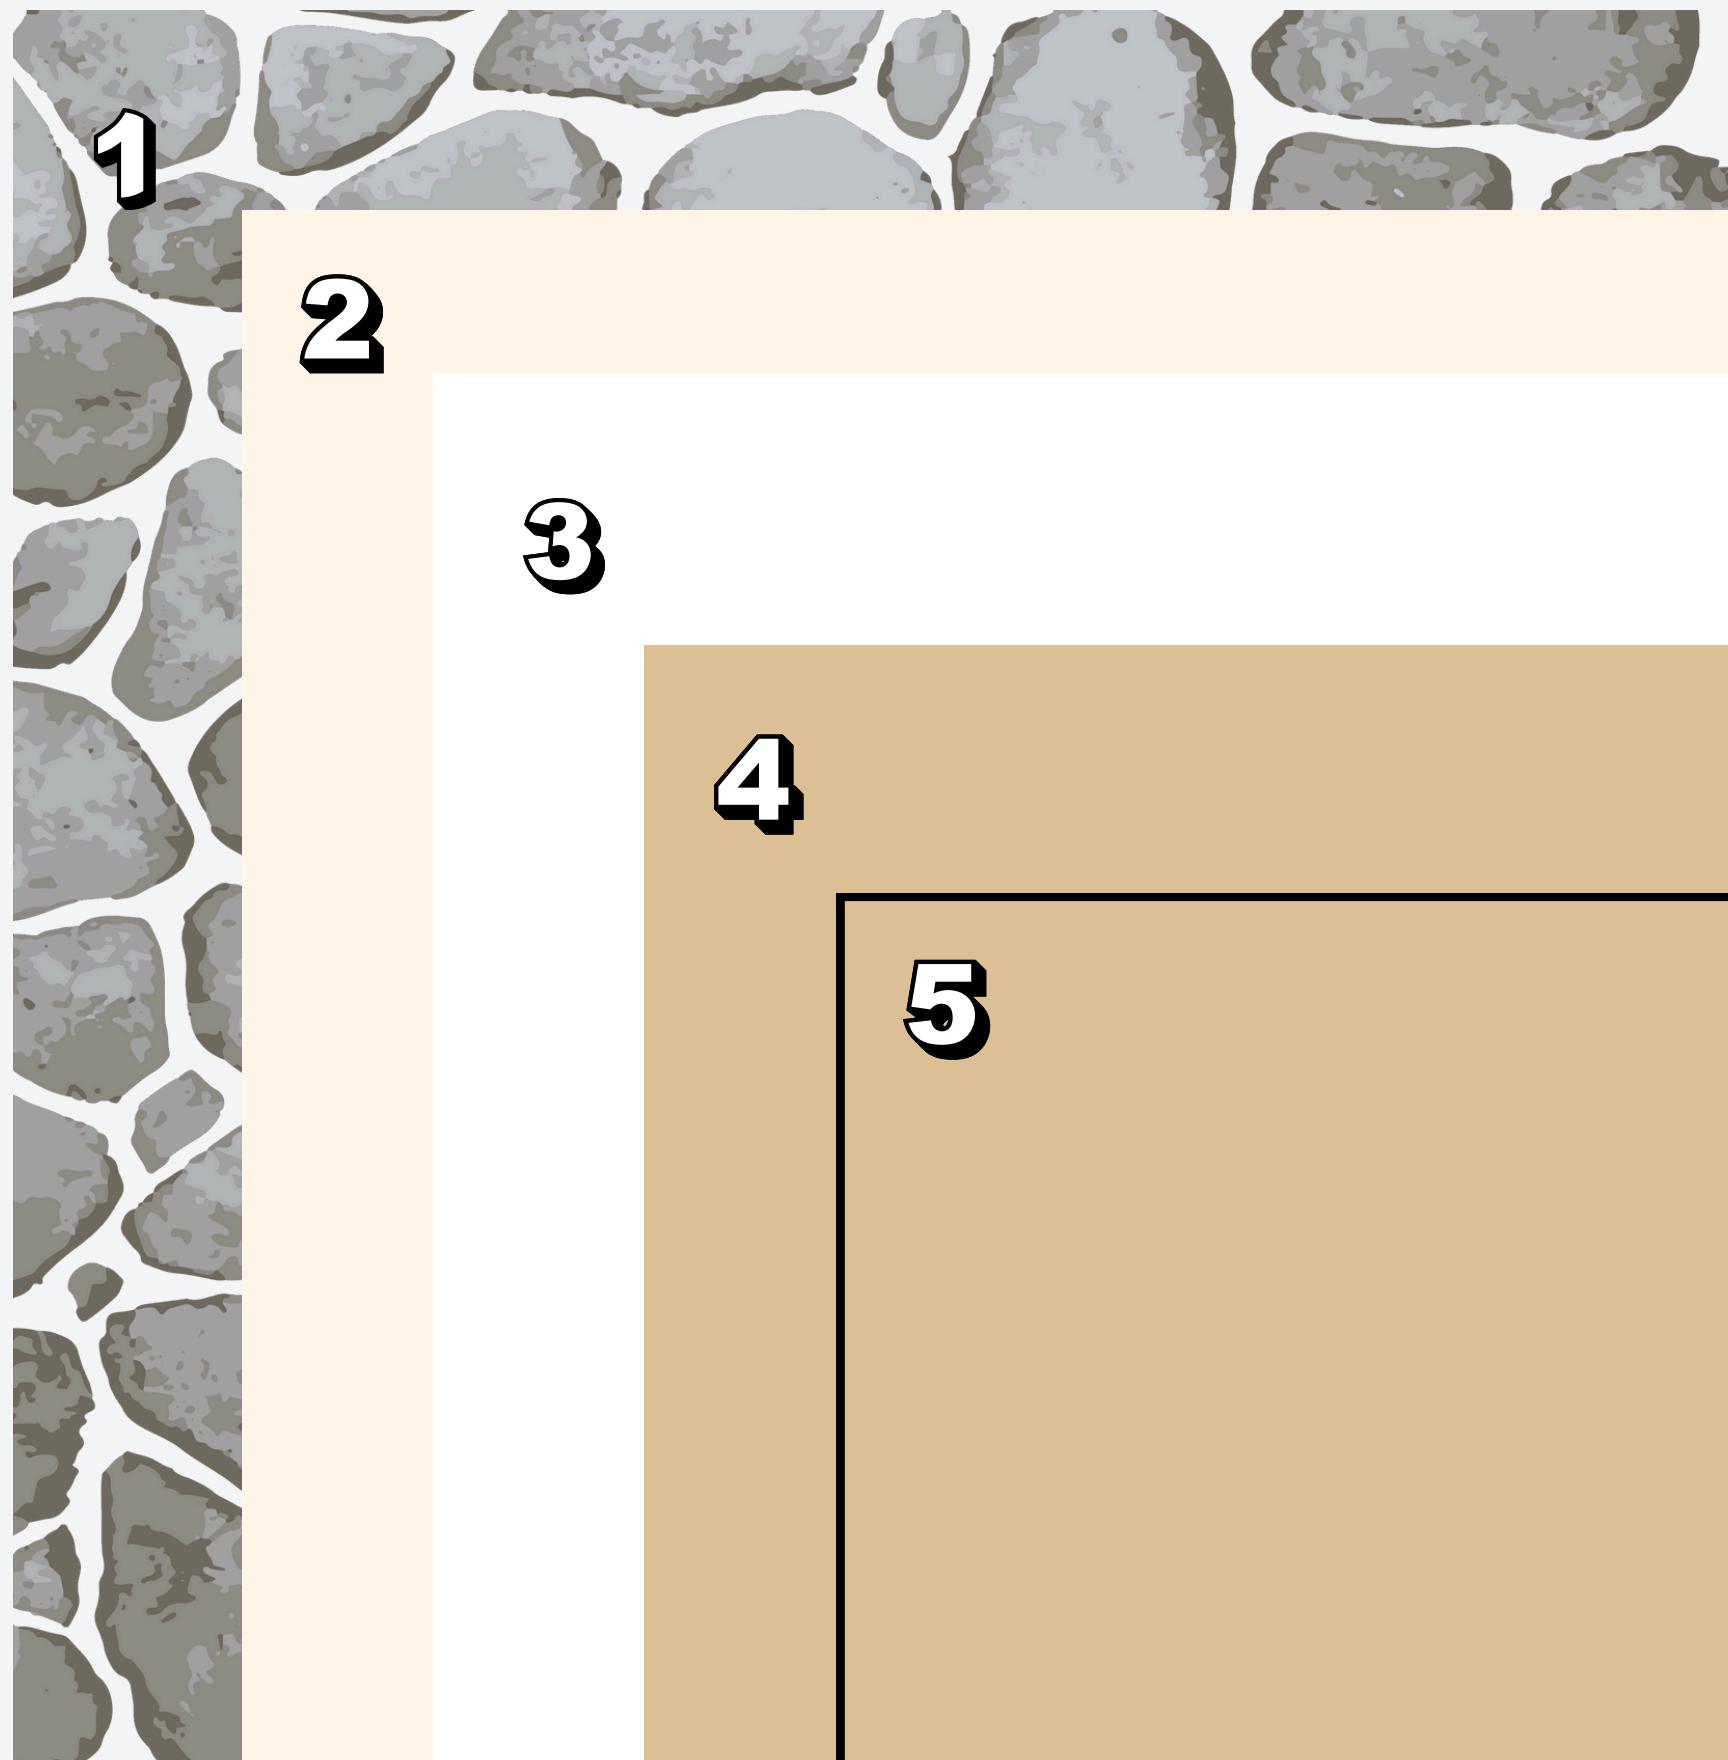

Once the surface it's dry,  
put on the surface EST-  
26 Multilite (pure), then  
apply a layer of 4-5 mm  
of ESTonetex Restaura.

STEP 2

And wet on wet, put the  
necessary thickness  
with ESTonetex  
Restaura.

STEP 3

1. Stone wall
2. EST-12
3. EST-26 Multilite
4. ESTonetex Restaura (4-5 mm)
5. ESTonetex Restaura (1-20 cm)

Consumption Restaura: 1 - 2 bags x  
sqm

# THEME PARKS

## *Rollercoasters*

- In this kind of works, the amount of square meters use to be large
- The most common structures are made with iron and EPS

- For this kind of works, we can use:
  - ESTonetex Park
  - ESTonetex TXT

## *Theme decorations*

# IRON STRUCTURE

Fix the mesh on the surface with staples.

**STEP 1**

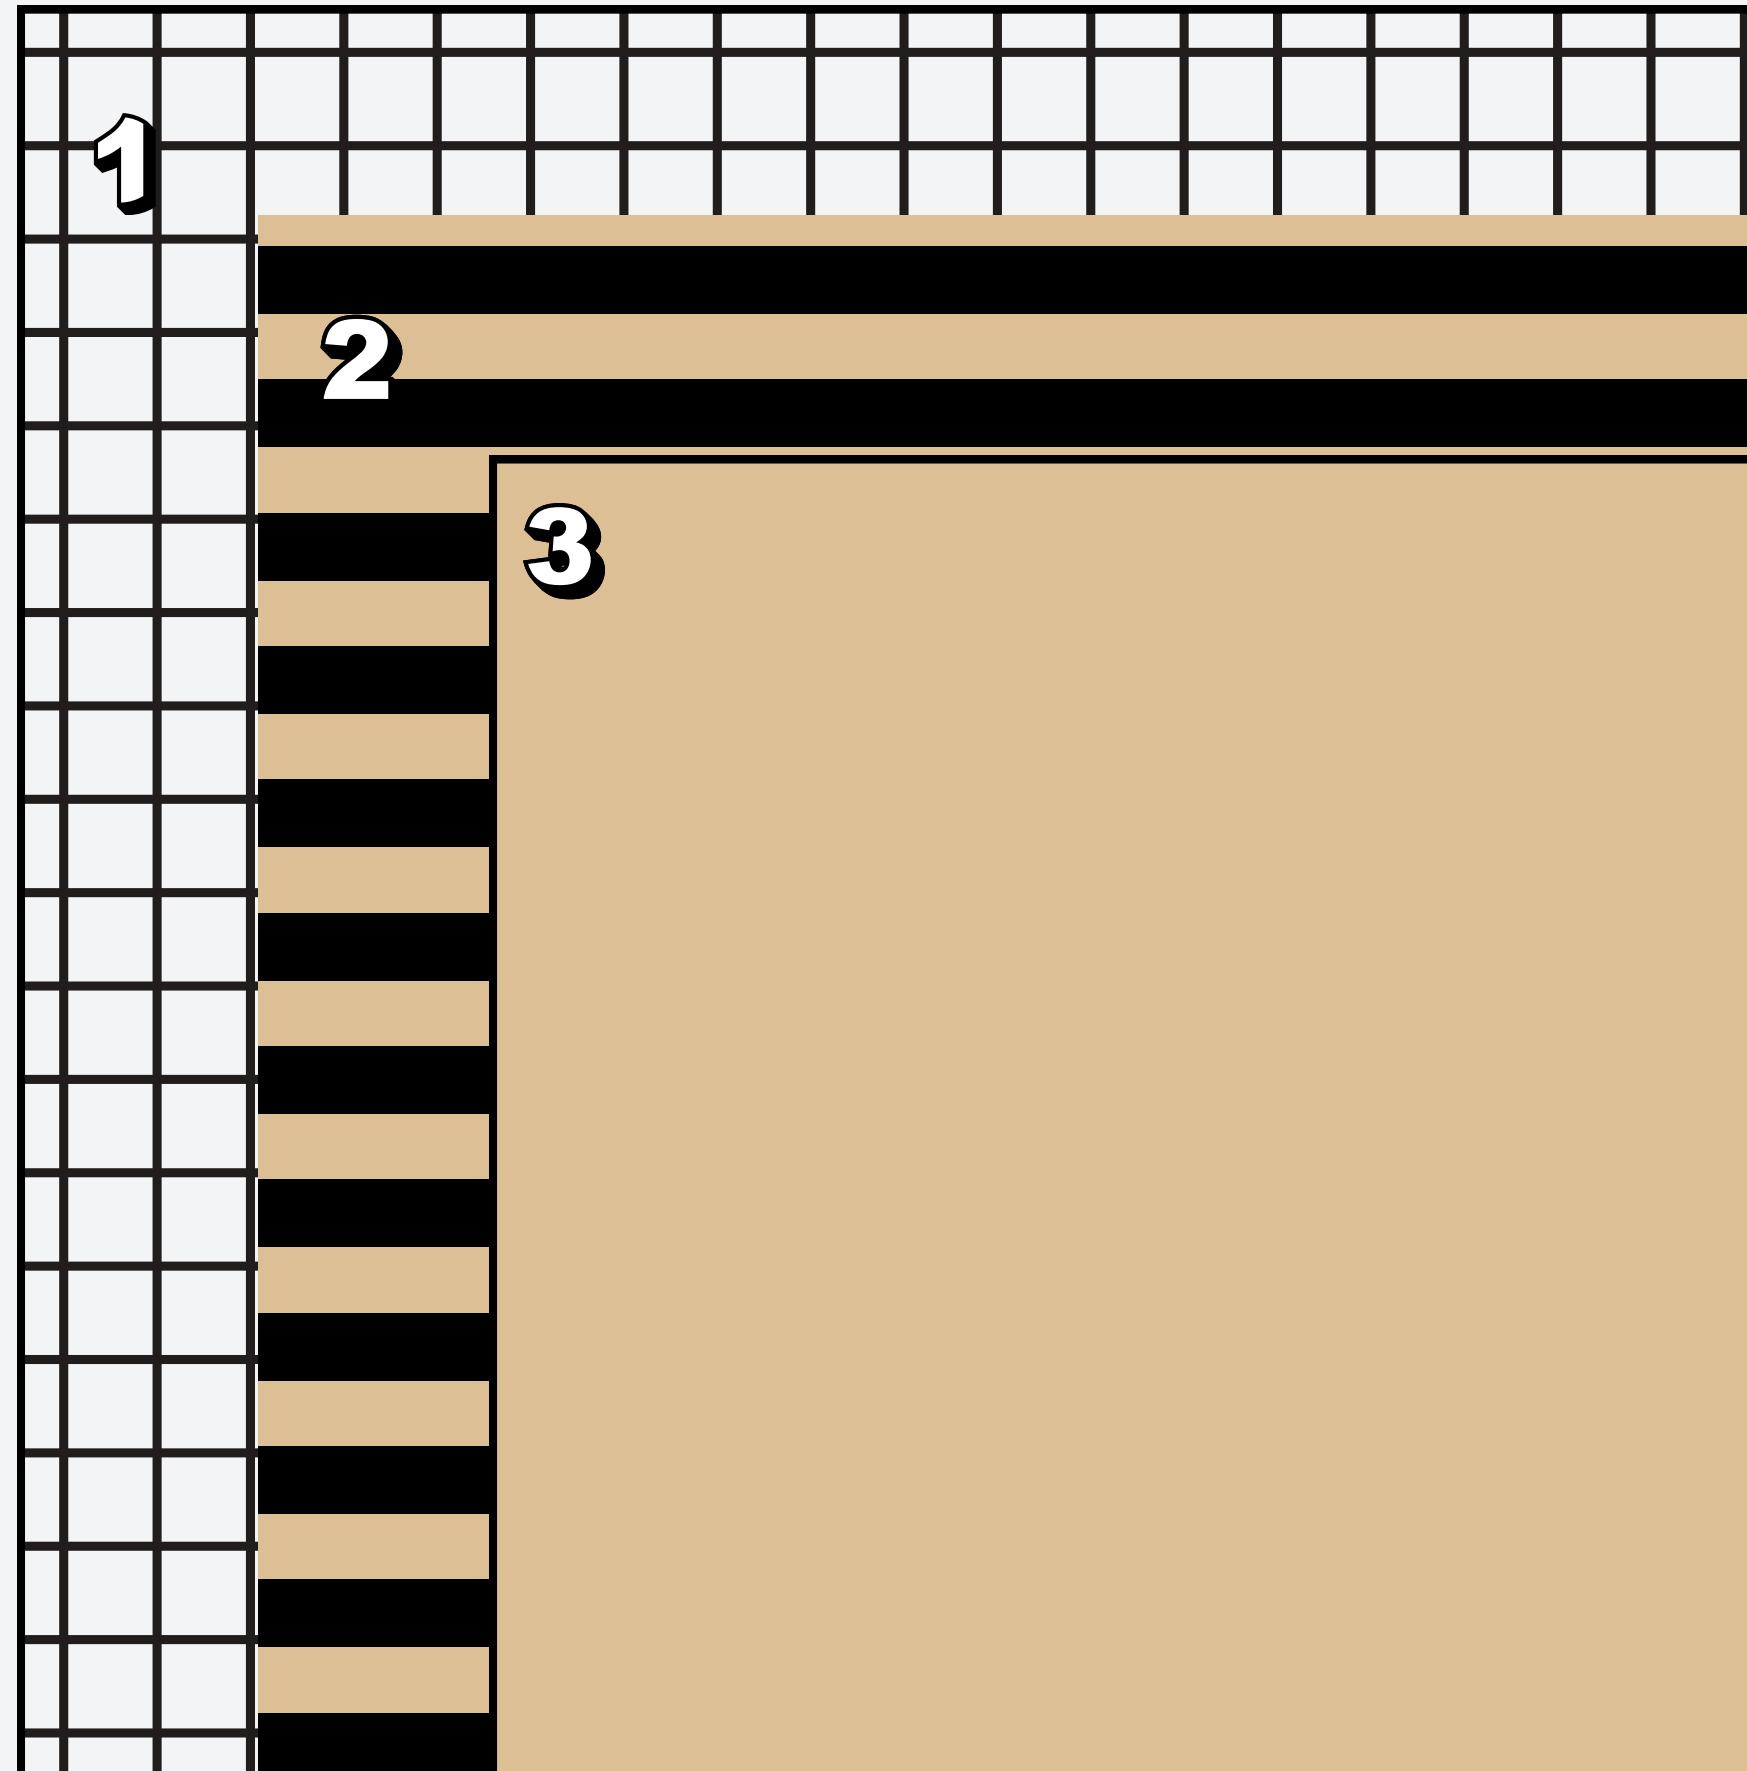

Apply a thin layer of 4-5 mm of mortar ESTonetex Park. After a few minutes, scratch the surface and wait 24 hours.

**STEP 2**

Once the scratch coat is dry, apply mortar ESTonetex Park, with the necessary thickness.

**STEP 3**

1. Mesh (fiberglass, iron or plastic)
2. ESTonetex Park (4-5 mm)
3. ESTonetex Park (1-20 cm)

Consumption TXT: 2 bags x sqm

# STYROFOAM (EPS-XPS)

Scratch the styrofoam  
and clean the surface.

STEP 1

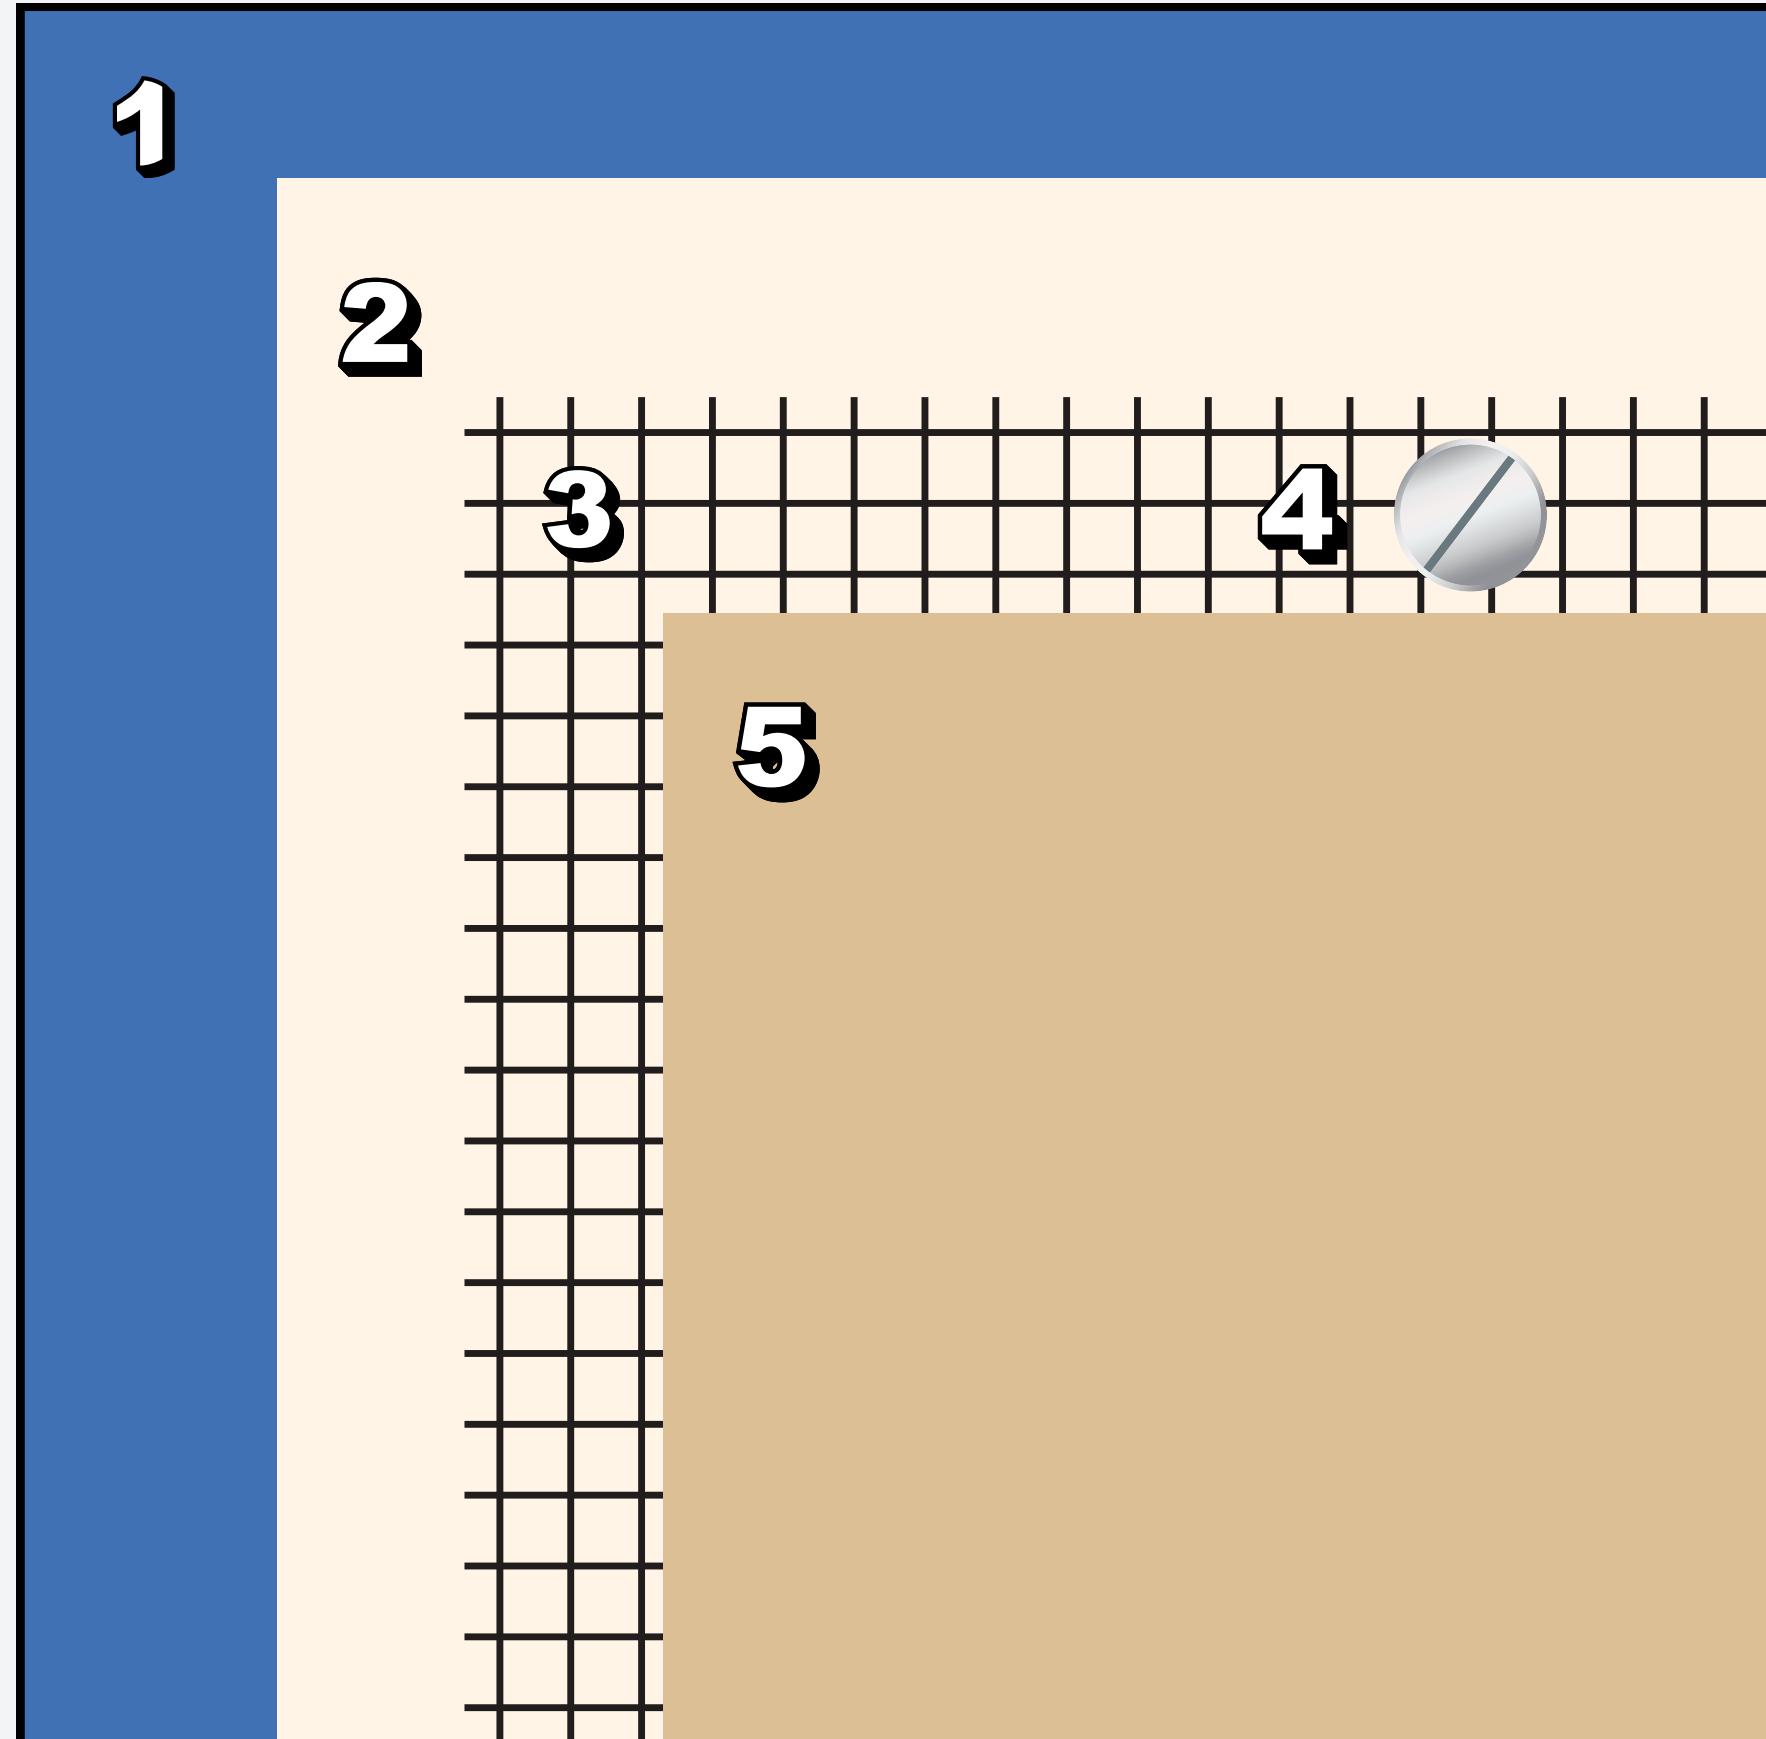

Apply a thin layer of 4-5  
mm of mortar  
ESTonetex Forte.  
And put a fiberglass  
mesh on top.  
After a few minutes,  
scratch the surface and  
wait 24 hours.

STEP 2

Once the first layer is  
dry, apply mortar  
ESTonetex Park with  
the necessary thickness

STEP 3

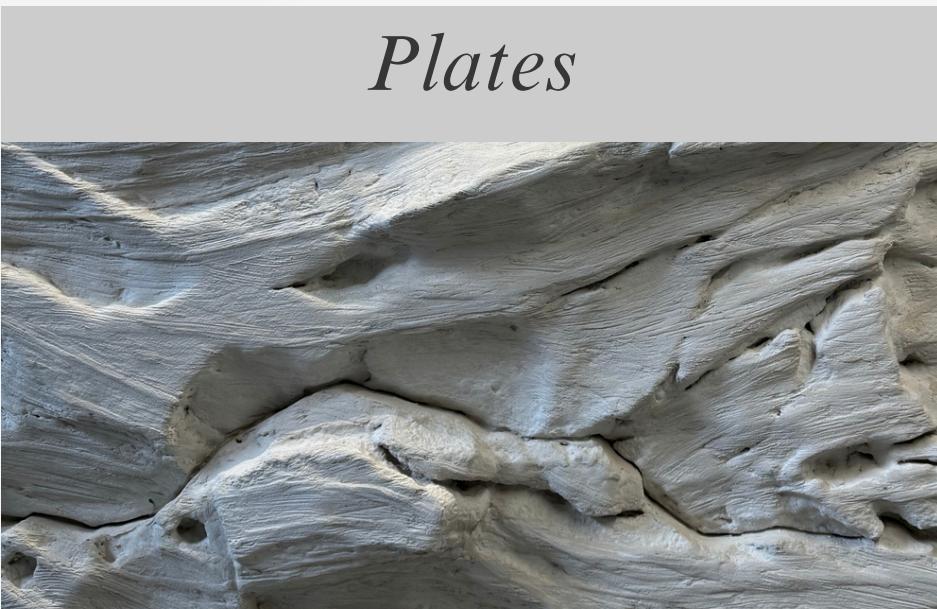

1. Styrofoam plate
2. ESTonetex Forte (4-5 mm)
3. Fiberglass mesh (82 gr)
4. Fixing anchors (70 mm)
5. ESTonetex TXT / Park (1-20 cm)

Consumption Forte: 8,3 kg x sqm  
Consumption TXT: 2 bags x sqm

# DECORATIVE PLATES

- They have a double function: decorative and isolation
- This pieces can be done on your facilities, so it allows to save time and money

- For this kind of works, we can use:
  - ESTonetex Forte
  - ESTonetex Forte-Mix

# STYROFOAM (EPS-XPS)

Carve the textures and shapes on the EPS as precisely as possible

STEP 1

Apply a first layer of 2-3 mm of mortar ESTonetex Forte / Forte-Mix.

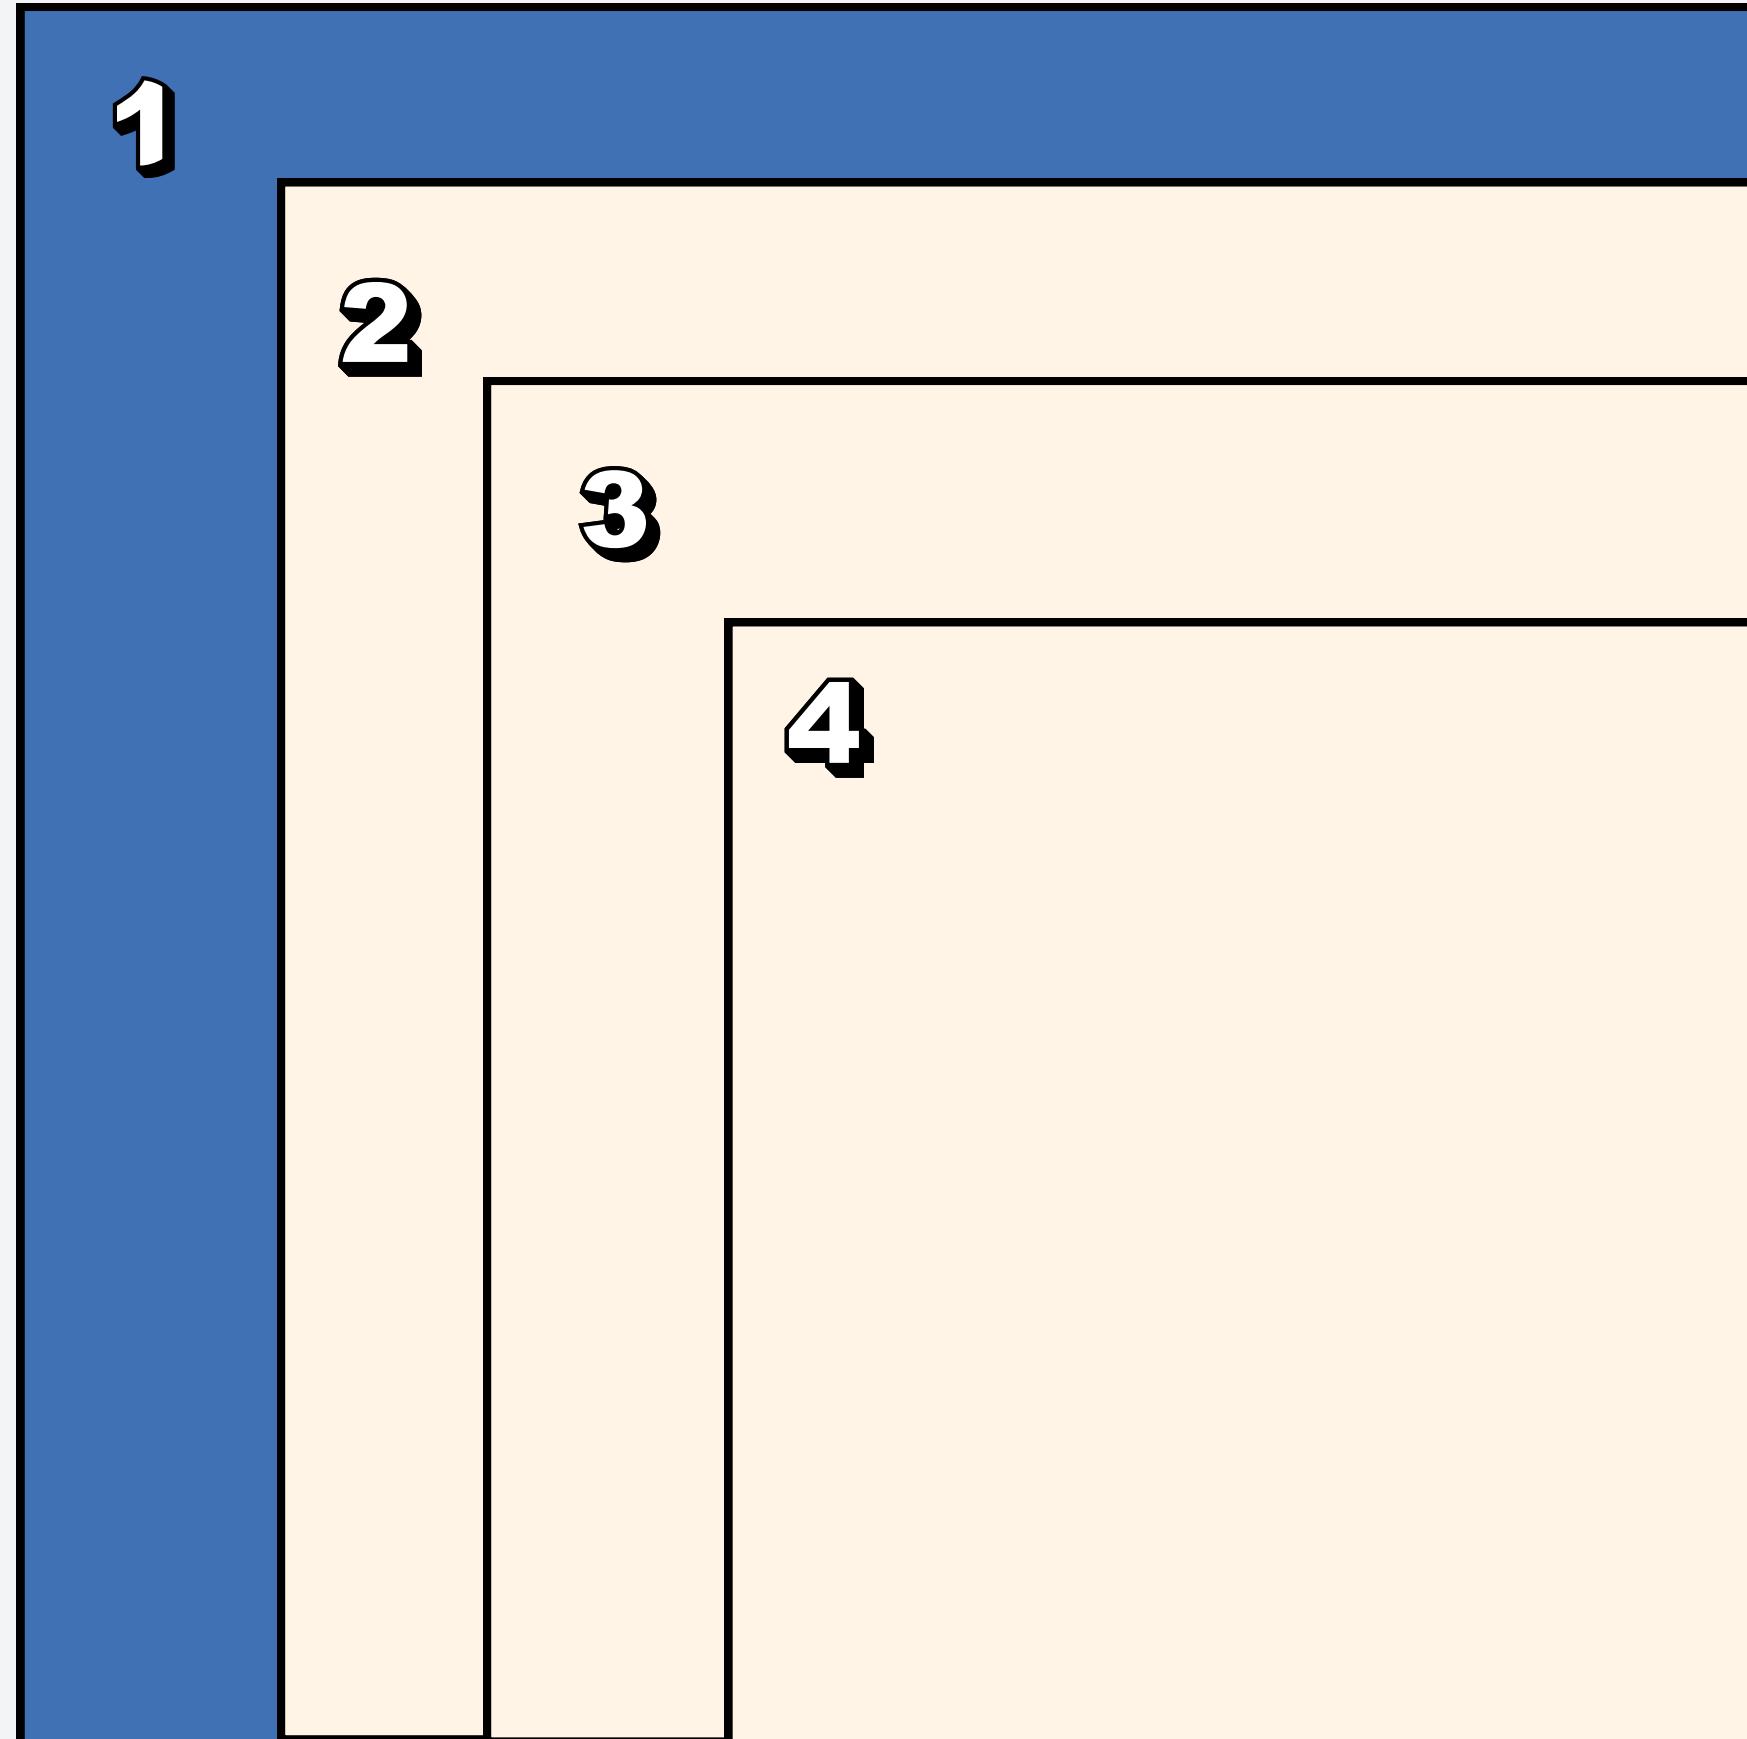

Wait a few minutes, and then apply a second layer of 2-3 mm of mortar ESTonetex Forte / Forte-Mix.

STEP 2

Finally apply a third layer of 2-3 mm of mortar ESTonetex Forte / Forte-Mix.

STEP 3

1. Styrofoam plate
2. ESTonetex Forte / Forte-Mix  
(2-3 mm) - 1st layer
3. ESTonetex Forte / Forte-Mix  
(2-3 mm) - 2nd layer
4. ESTonetex Forte / Forte-Mix  
(2-3 mm) - 3rd layer

Consumption Forte: 8,3 kg x sqm
